- Dolby Atmos for cinematic sound.
- Ready for gaming. VRR and low input lag on any console.

PHILIPS

Highlights

Ambilight TV

Ambilight TVs are the only TVs with integrated LED lights on the back that react to what you watch, immersing you in a halo of colourful light. This changes everything: your TV seems bigger, and you'll be drawn deeper into your favourite sports, films, music and games.

Bright, ultra-sharp picture

Love everything you watch on this bright 4K (UHD) LED Ambilight TV. The Philips Pixel Precise Ultra HD engine optimises picture quality to deliver ultra-sharp images, rich colours and smooth motion. You get the best possible viewing experience every time.

TITAN OS smart platform

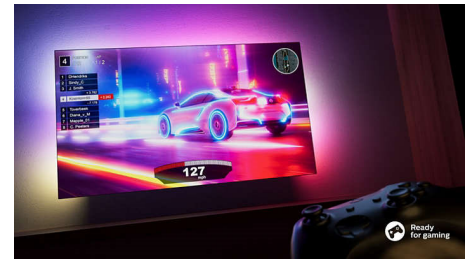

Finding what you love is quick and easy with our TITAN OS smart TV platform. Enjoying a series? You can continue watching straight from the home screen. If you're looking for something new, you can browse categories like action or drama and see suggestions from the top streaming services—all in one place.

Dolby Atmos®

Dolby Atmos pulls you in deeper by placing sound effects in the space around and above you. Whether it's spaceships flying overhead or quiet footsteps sneaking up from behind, you'll feel like you're right in the middle of the action.

Ready for gaming

HDMI VRR lets you get the best from your console, with fast gameplay and smooth graphics. Low-input-lag setting activates automatically when you turn on your console. Ambilight's gaming mode makes the thrills feel bigger.

Responsible packaging

The virtually bezel-free screen and slim stand of this Ambilight TV go with just about any interior, and you can use Ambilight for instant mood lighting when the screen is off. Our packaging uses FSC-certified recycled cardboard and the inserts are printed on recycled paper.

Seamless control

Seamless compatibility with Matter and Control4 means you can easily integrate this 4K Ambilight TV into your existing smart home network. For voice control, a button on your remote puts your TV in listening mode so you can speak directly to the TV's built-in Alexa. Or you can use Google smart speakers.

Far-field mic

This Ambilight TV has a far-field mic on board that picks your voice up clearly, even if you're further away or if there's some noise going on around you. Once you've pushed the Alexa button on your remote, you can ask your TV anything, from anywhere in the room.
