- Aromas comply with IFRA safety standards

#### App controlled aroma-diffusion system

- Safe rounded design looks great and fits in your cup holder
- Smart device ensures consistent scent experience
- USB-powered and controllable from your phone

# PHILIPS

# Highlights

## Uses dry-diffusion technology

The Philips OlfaPure 7100 uses a dry-air diffusion method, a more advanced way to release fragrance. Dry-air diffusion works by applying pressurized airflow over a material infused with a fragrance, or active ingredient. This minimizes the release of particles into the air, resulting in extremely low levels of VOCs (volatile organic compounds) and other undesirable particles. Which means healthier air to breathe, especially for those people with respiratory issues.

## IFRA certified safe to breathe

The fragrances used by the OlfaPure 7100 have been tested to ensure compliance with the International Fragrance Association (IFRA) standards. This checks that the scent contains the correct volumes of essential oils, and that all ingredients are safe for use.

## Enjoy four stunning scents

With four plug-and-play cartridge slots, the Philips OlfaPure 7100 can be loaded with the four aromas of your choice with 10 different fragrances to choose from overall. Each fragrance is crafted in the south of France from high-quality ingredients. So depending on how you're feeling, or what kind of journey it's going to be, you can choose the perfect mood enhancing aroma at the touch of a button. Each long-lasting cartridge will deliver a consistent volume over its lifetime. Plus, you'll get reminded when it's time to replace the cartridge.

## Enhance your mood with aroma

With the Philips OlfaPure 7100 car aroma diffuser, you can choose the perfect scent for your mood as you drive. Enhance the comfort of every drive with a series of scents carefully crafted in France, the fragrance capital of the world. The OlfaPure will diffuse just the right scent, whether you want to relax during a stressful commute, feel more alert on a long drive, ease the symptoms of motion sickness, or freshen the air. And it all happens with the touch of a button.

## Safer ergonomic design

The Philips OlfaPure 7100 is designed with curves in all the right places. Its attractive ergonomic design is easy to handle, and it fits snugly into your vehicle's cup holder. Plus, the device's edges are sufficiently rounded (curvature of >2.5mm radius) to minimize the chances of injury to passengers, in the event of a collision.

## Precision scent profile

The Philips OlfaPure 7100 uses a dry-air diffusion method, a more advanced way to release fragrance. Dry-air diffusion works by applying pressurized airflow over a material infused with a fragrance, or active ingredient. This minimizes the release of particles into the air, resulting in extremely low levels of VOCs (volatile organic compounds) and other undesirable particles. Which means healthier air to breathe, especially for those people with respiratory issues.

## Smart aroma diffusion system

The Philips OlfaPure 7100 is an advanced diffusion system that electronically manages the delivery of each fragrance. When the plug-and-play cartridges are loaded into the diffuser, the system recognizes them. With the accompanying smartphone app you can select your preferred fragrance or schedule it for use at a pre-selected time, while keeping an eye on the volume of remaining scent. The device also works automatically, turning on and off with your ignition, so you can focus on driving. After two hours of continuous use, the diffuser automatically turns off.

## Bluetooth and USB connections

The Philips OlfaPure 7100 is a self-contained scent diffuser system that fits easily into a standard cup holder. Powered by a standard USB connection, the device works manually, or you can operate by connecting to the app, via bluetooth.

# Specifications

## Marketing specifications

- Product highlight: No more nose blindness
- Expected benefits: Precise scent release

## Product description

- Color: Pearl White
- Designation: Smart Car Aroma Diffuser
- Range: OlfaPure 7101
