### Important safety information

Read this important information carefully before you use the appliance and save it for future reference.

#### Warning

- This appliance can be used by children aged from 8 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved. Children shall not play with the appliance. Cleaning and user maintenance shall not be made by children without supervision.

- When the appliance is used in a bathroom, unplug it after use since the proximity of water presents a hazard, even when the appliance is switched off.
- For additional protection, we advise you to install a residual current device (RCD) in the electrical circuit that supplies the bathroom. This RCD must have a rated residual operating current not higher than 30mA. Ask your installer for advice.
- WARNING: Do not use this appliance near bathtubs, showers, basins or other vessels containing water (Fig. 1).
- The supply cord cannot be replaced. If the supply cord is damaged, you must have the appliance replaced by Philips, a service center authorized by Philips or similarly qualified persons in order to avoid a hazard.
- WARNING: Do not use this appliance near water.
- Always unplug the appliance after use.
- Do not pull on the supply cord after using. Always unplug the appliance by holding the plug.
- Before you connect the appliance, ensure that the voltage indicated on the appliance corresponds to the local power voltage.
- Do not use the appliance for any other purpose than described in the user manual.
- Do not use the appliance on artificial hair.
- When the appliance is connected to the power, never leave it unattended.
- Never use any accessories or parts from other manufacturers or that Philips does not specifically recommend. If you use such accessories or parts, your warranty becomes invalid.

- Do not wind the supply cord around the appliance.
- Wait until the appliance has cooled down before you store it.
- Do not operate the appliance with wet hands.
- Always return the device to a service center authorized by Philips for examination or repair. Repair by unqualified people could cause an extremely hazardous situation for the user.
- Do not connect the appliance with a plug adapter. If really necessary, only use a certified plug adapter.
- If the appliance overheats, it switches off automatically. Unplug the appliance and let it cool down for a few minutes. Before you switch the appliance on again, check the grilles to make sure they are not blocked by fluff, hair, etc.
- Do not insert metal objects into the air grilles to avoid electric shock.
- Never block the air grilles.

### Troubleshooting

Problem	Cause	Solution
The appliance does not work at all. And/or false flashing of white light constantly.	The power socket to which the appliance has been connected may be broken.	Check the appliance is plugged in correctly. Check the fuse for this power socket in your home.
The appliance may have overheated and switched itself off.		Unplug the appliance and let it cool down for a few minutes. Before you switch on the appliance again, check the grilles to make sure they are not blocked by fluff, hair, etc. Clean the air inlet grille.
The appliance may not be suitable for the voltage to which it has been connected.		Ensure that the voltage indicated on the type plate of the appliance corresponds to the local power voltage.
There is bad smell for the first-time of use.	The smell may come from the new appliance.	The smell will gradually disappear after a few uses. Please try to dry your hair in a well-ventilated room.
There is burning smell when drying my hair.	If there is some dust or residue left in the appliance, it may be burnt due to the high temperature and produce odor.	Turn off the appliance and wait until it cools down. Check if any residues left. Remove dirt from the air inlet grille and keep it clean regularly.
I hear annoying noise when using auto-clean mode.	The motor setting is different under auto-clean mode.	Use auto-clean mode once a month to avoid blocking.
