Highlights

Extra little and light

Our newborn soother is designed to fit the mouths and faces of very little ones. It's super small and lightweight, making it their ideal first soother and fulfilling their natural suckling needs from day one.

98% teat acceptance

When we asked parents how their little ones respond to our textured silicone teats, an average of 98% said that their baby accepts Philips Avent ultra soothers.

Orthodontic teat

Our orthodontic, symmetrical, soft silicone teats are designed for natural oral development.

100% silicone teat

We consciously use only silicone for our Philips Avent soother teats. The silicone is 100% food-grade, and free from BPA, BPS, Phthalate, PVC and Polycyclic aromatic hydrocarbons.

Sterilise in 3 minutes

Philips Avent ultra start soothers come in a reusable carrying box that doubles as a steriliser. Just add some water and pop it in the microwave for three minutes. Easy, hygienic and ready for when your little one needs it.
