- Easily clean and assemble with fewer parts

Gentle and comfortable

- Soft silicone cushion offers comfort for every body

Quick expressing, more milk in less time*

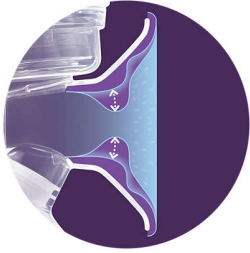

- Natural Motion Technology gets milk moving quickly*

Finding the right teat is important

- Finding the right teat is important

Highlights

Quick milk flow*

Milk starts to flow in as little as one minute thanks to our unique Natural Motion Technology.** With a gentle latch-on and just the right massage and suction, it's no surprise that 97% of moms say the pump is effective***, and 100% of midwives recommend it.

Adapts to your nipple

Whatever your shape, the pump's soft, flexible silicone cushion meets your breast and nipple comfortably. Fitting 99.98%**** of breast sizes***, it adapts for a latch-on that's soft yet secure.

Finding the right teat is important

If your newborn baby is consistently not taking enough milk throughout the feeding sessions or has complications in getting milk, switch to a teat with a higher flow rate. If persistent feeding issues occur, consult a healthcare professional.

Find the right teat flow

Every baby feeds differently and develops at their own pace. We've designed a range of flow rates so you can find the perfect one for your baby and personalise your bottle. All of the Natural Response Teats are made of soft silicone.

Personalize to your needs

Get the most from every session with 8 modes for stimulating the flow of milk and 16 modes for expressing it. You can fine-tune as you go.

Clean and setup easily

We designed our pump to be free from complexity. So with few parts it's also a breeze to clean and assemble.

Express anywhere discreetly

Our pump's motor is practically silent in use. So you can express at home (or anywhere) discreetly, and with one less distraction.

Start with your last session settings

The memory function automatically stores your last stimulation and expression settings. So all you need do is get comfortable and push start.

Pause when you want to

You're in control. With one-touch pause/play, you can take a break from your session then resume it whenever you're ready.

Specifications

Power

Mains voltage: 100V - 240 V

Material

Breast pump: BPA-free***** (food contact parts only)

What is included

Disposable breast pad: 2 pcs

Expression kit: 2 pcs
