Smart safe box

Fingerprint unlocking

Electronic telescopic handle
WiFi connectivity
Two-factor authentication

SBX602C7GU

WiFi connectivity

For enhanced security with real-time protection

SBX602 supports various unlocking methods. It features an innovative fingerprint-enabled telescopic handle for seamless security. Along with WiFi connectivity and dual authentication mode, it provides a safe and convenient storage solution.

Upgraded intelligence for enhanced security

- For a quick and carefree access experience.
- Ensure real-time monitoring for added security
- Support two-factor authentication

Exquisite craftsmanship for reliable safety

- Offer seamless defense
- Boasts concealed design and elegant appearance
- To effectively against drilling and prying
- Responds instantly to light touch

Caring details to safeguard your private space

- Enables easy access
- Lights up upon door opening
- To safeguard your privacy
- Provide peace of mind every day

Smart safe box

Fingerprint unlocking Electronic telescopic handle, WiFi connectivity, Two-factor authentication

SBX602C7GU/97

Highlights

Integrated cabinet body

The safe is constructed from high-strength carbon alloy steel plate, cut and formed using laser technology, providing effective resistance against prying, smashing, and drilling. Its robust and durable build ensures long-lasting security. The minimalist dual-line design of the door not only enhances aesthetics but also adds a touch of contemporary style to the safe.

Compartmentalized storage

The cabinet interior employs a distributed layout, complete with rail-guided drawers, offering easy storage for valuable items like jewelry and small objects. The synthetic leather interior adds a comfortable touch, ensuring a pleasant storage experience.

Multiple unlocking methods

It comes with a concealed digital panel and touch-to-wake buttons. The advanced semiconductor biometric fingerprint technology ensures precise and highly secure identification. There is also mechanical keyhole

located on the door's side for a hassle-free and worry-free unlocking experience.

Built-in LED light

The interior of the safe is equipped with a built-in night vision light that automatically illuminates upon opening, facilitating users in locating and accessing their items in dim environments.

WiFi connectivity

Through mobile device WiFi connectivity, our intelligent monitoring system ensures real-time security updates for the safe, granting you greater peace of mind while you're away.

Crafted telescopic handle

Presenting an innovative design, the electronic telescopic handle features an embedded fingerprint unlocking system. Crafted from electroplated zinc alloy, the handle guarantees great corrosion resistance and durability. During everyday use, the handle stays hidden within the cabinet, extending automatically

when unlocked. After securely closing and locking the door, the handle retracts automatically.

Enhanced security mode

In the enhanced security mode, opening the cabinet door requires verification of any two sets of configured fingerprints or passwords, providing a dual-layered safeguard for the security of your valuable belongings.

32 mm solid locking bolts

The safe's door is fortified with 32 mm solid stainless steel locking bolts, which tightly secure the door panel upon locking. This robust design not only ensures durability but also significantly elevates the overall security level.

Concealed compartment

The bottom of the safe is equipped with a concealed compartment, creating a more discreet and private storage space for you.

Specifications

Color scheme

- Gray

Power supply

- Battery life*: 6-12 months
- Working voltage: 4.5 ~ 6 V
- Battery for backup system: 4 pieces AA battery

Net weight of product

- 113 kg

Dimensions of product (LxWxH)

- 750×480×430 mm

Unlocking methods

- Fingerprint: maximum 30 sets
- PIN code: maximum 10 sets
- Mechanical key

Indicator lights

- Blue: normal working
- Green: recognition succeeded
- Red: recognition failed

Issue date 2024-08-21

Version: 3.3.1
