

Philips 6000 Series  
Smart safe box

### Fingerprint unlocking

Electronic telescopic handle  
WiFi connectivity  
Two-factor authentication

SBX602C5DU

## WiFi connectivity

For enhanced security with real-time protection

SBX602 supports various unlocking methods. It features an innovative fingerprint-enabled telescopic handle for seamless security. Along with WiFi connectivity and dual authentication mode, it provides a safe and convenient storage solution.

### Upgraded intelligence for enhanced security

- For a quick and carefree access experience.
- Ensure real-time monitoring for added security
- Support two-factor authentication

### Exquisite craftsmanship for reliable safety

- Offer seamless defense
- Boasts concealed design and elegant appearance
- To effectively against drilling and prying
- Responds instantly to light touch

### Caring details to safeguard your private space

- Enables easy access
- Lights up upon door opening
- To safeguard your privacy
- Located on door's side for discreet security
- Provide peace of mind every day

# Highlights

## Compartmentalized storage

The cabinet interior employs a distributed layout, complete with rail-guided drawers, offering easy storage for valuable items like jewelry and small objects. The synthetic leather interior adds a comfortable touch, ensuring a pleasant storage experience.

## Multiple unlocking methods

It comes with a concealed digital panel and touch-to-wake buttons. The advanced semiconductor biometric fingerprint technology ensures precise and highly secure identification. There is also a mechanical keyhole located on the door's side for a hassle-free and worry-free unlocking experience.

## Integrated cabinet body

The safe is constructed from high-strength carbon alloy steel plate, cut and formed using laser technology, providing effective resistance against prying, smashing, and drilling. Its robust and durable build ensures long-lasting security. The minimalist dual-line design of the door not

only enhances aesthetics but also adds a touch of contemporary style to the safe.

## Crafted telescopic handle

Presenting an innovative design, the electronic telescopic handle features an embedded fingerprint unlocking system. Crafted from electroplated zinc alloy, the handle guarantees great corrosion resistance and durability. During everyday use, the handle stays hidden within the cabinet, extending automatically when unlocked. After securely closing and locking the door, the handle retracts automatically.

## Built-in LED light

The interior of the safe is equipped with a built-in night vision light that automatically illuminates upon opening, facilitating users in locating and accessing their items in dim environments.

## WiFi connectivity

Through mobile device WiFi connectivity, our intelligent monitoring system ensures real-time

security updates for the safe, granting you greater peace of mind while you're away.

## 32 mm solid locking bolts

The safe's door is fortified with 32 mm solid stainless steel locking bolts, which tightly secure the door panel upon locking. This robust design not only ensures durability but also significantly elevates the overall security level.

## Concealed compartment

The bottom of the safe is equipped with a concealed compartment, creating a more discreet and private storage space for you.

## Enhanced security mode

In the enhanced security mode, opening the cabinet door requires verification of any two sets of configured fingerprints or passwords, providing a dual-layered safeguard for the security of your valuable belongings.

# Specifications

## Color scheme

- Gold

## Power supply

- Battery life\*: 6-12 months
- Working voltage: 4.5 ~ 6 V
- Battery for backup system: 4 pieces AA battery

## Net weight of product

- 70.5 kg

## Dimensions of product (LxWxH)

- 550×400×360 mm

## Unlocking methods

- Fingerprint: maximum 30 sets
- PIN code: maximum 10 sets
- Mechanical key

## Indicator lights

- Blue: normal working
- Green: recognition succeeded
- Red: recognition failed
