- AirFloss Nozzle: 3

Cleaning performance

- Nozzles: Best results change every 6m

Highlights

An easy way to start

Interproximal cleaning is very important to overall oral health. AirFloss is an easy way to clean deeper between teeth, helping to form a healthy habit. After three months of using AirFloss, 96% of inconsistent flossers continued to use AirFloss four or more days per week.

Guidance tip

The slim angled nozzle and guidance tip make finding the correct placement easy. Just slide along the tooth's surface near the gum line until the tip fits into the groove between the teeth.

Air and micro-droplet tech

AirFloss utilises unique air and micro-droplet technology to send a burst of pressurised air and water or mouthwash between your teeth. The one-touch activation button is as simple as a mouse click.

Slim, angled nozzle

Slim, angled nozzle designed for easy access to hard-to-reach areas
