- 30% smoother** gliding with Protective SkinGlide Coating

For a convenient shave

- Effortless charging with convenient stand available to hand.
- 60 minutes of cordless shaving once fully charged
- Adapts to your contours with 360 degree Flexing Heads
- Adjusts to your beard density with Power Adapt Sensor
- Deep cleaning in just 1 minute for hygienic shaving
- Enhance your shaving experience with Philips Shaving App***
- Choose a convenient dry or refreshing wet shave

Premium experience

Limited Edition 9000 Series

Space-Grade Steel Electric Shaver

S9980/54

Highlights

Space-grade precision blades

Forged from high-performance, space-grade steel and designed to self-sharpen for 2 years, the 360 degree rotary blades cut hair in every direction, matching the natural hair growth.

Lift & Cut System

Our patented, unique Lift & Cut rotary technology lifts the hair gently out of its root before cutting it precisely at skin level close (up to 0.00 mm to the skin) without the blades even touching your skin.

Pressure Guard sensor

Using the right pressure is key for closeness and skin protection. Advanced sensors in the shaver read the pressure you apply, and the innovative light signal shows when you are pressing too hard or too little. For a personalised shave that is just right for you.

360 D Flexing heads

Designed to follow the contours of your face and neck, this Philips electric shaver has fully flexible heads that turn 360 degrees for a thorough and comfortable shave.

Up to 5-year warranty****

Our shavers are engineered for excellence and come with a 5 year warranty so you can enjoy ultimate reliability and performance, shave after shave.

Protective SkinGlide coating

A protective coating lies between the shaver heads and your skin. Made with up to 250,000 micro-tech beads per square centimetre, the coating improves gliding by 30%***, to minimise irritation.

Power Adapt sensor

The electric shaver has an intelligent facial-hair sensing technology that reads hair density 500 times per second. The Power Adapt Sensor auto-adapts the cutting power for an effortless and gentle shave.

Personalisation via app

Perfect your shave by pairing your shaver with the Philips Shaving app. Shave by shave, track the progress of your skin, personalise your shave and master your technique for a shave that's as close as it is kind to skin.

Cable-free Quick Clean Pod

Powerful cleaning pod thoroughly cleans and lubricates your shaver in just 1 minute, keeping it performing at its best for longer. The pod is 10 x more effective than cleaning with water****. It is the world's smallest cleaning pod, so you can store it easily and use it anywhere.

Limited Edition 9000 Series

Space-Grade Steel Electric Shaver

S9980/54

Highlights

Wet & Dry

Adapt your shaving routine to your needs. With Wet and Dry, you can go for a comfortable dry shave or a refreshing wet shave. You can shave with gel or foam, even under the shower.

Pop-up trimmer

Complete your look using the shaver's pop-up precision trimmer. Integrated into the shaver's body, it's the perfect way to maintain a moustache and trim sideburns.

Sustainability

By replacing 30% of our internal plastics with recycled plastics, we are saving tons of virgin plastic in our production. On top of that, our blades are made from 80% recycled steel and produced in a factory that uses 100% renewable energy.

Charging stand

Fully charge your shaver within 1 hour in the stand. A stand created for both conveniently charging your device and neatly storing it away.

Advanced OLED display

The first Philips shaver with a dynamic OLED display reveals every shaver feature and notification with sharp, fluid animation. The intuitive interface includes SkinIQ guidance, battery status, cleaning advice and more.

60 minutes of cordless shaving

This advanced charging system gives you two convenient options: 60 minutes of running time after a full charge, or a quick charge for one shave.
