AF541 with over-the-nose cushion (OTN), single-patient use

The AF541 full face mask system offers interchangeable under-the-nose (UTN) and over-the-nose (OTN) cushions to help offset skin breakdown at the bridge of the nose and other cushion contact points.

AF541 with over-the-nose cushion, CapStrap headgear, and standard elbow (SE)

AF541 with over-the-nose cushion, four-point headgear, and Leak 1 entrainment (anti-asphyxia valve) elbow (EE)

Philips AF531 accessories and replacement parts

Leak 1 entainment elbow (EE) click-style has an anti-asphyxia valve for dedicated noninvasive ventilators (use with single-limb circuits)

Leak 2 entainment elbow (EE) click-style has an anti-asphyxia valve for dedicated noninvasive ventilators and intentional Leak ports for sub-acute and homecare systems when intentional Leak is needed

Standard elbow (SE) click-style is typically used with a dual-limb circuit on ventilators equipped with integrated safety valve systems

Bronchoscopy elbow click-style must be used with an in-line exhalation port for single-limb circuits or without a port for dual-limb circuits
