## Inspired by baby. Effective for mum

### Natural motion technology for quicker milk flow\*

Enter a new era of expression with the Philips Avent Electric Breast Pump. The perfect balance of suction and nipple stimulation, inspired by baby's drinking rhythm, with a soft cushion that gently adapts to your nipple size and shape. See more below.

#### Other benefits

- Choose the right teat flow for your baby

#### Personalised and easy to use

- Minimal parts and intuitive setup
- Start/Pause function
- Memory function
- Quiet motor for a discreet experience anywhere
- Breast pump bag and pouch
- Personalised experience, 8 + 16 setting levels

#### Gentle and comfortable

- One-size soft and adaptive silicone cushion
- Express without leaning forward

#### Quick expressing, more milk in less time\*

#### Rechargeable battery and timer display

# Highlights

## Quick milk flow\*

Express more milk in less time\* with a cushion that stimulates the breast to express milk just like baby. It seamlessly adjusts from stimulation mode to expression mode and applies just the right amount of teat stimulation and suction for maximum milk flow. Based on milk flow initiation time (time to Milk Ejection Reflex — MER) results.\*

## Adapts to your nipple

One size fits all. Because we all come in different shapes and sizes, the silicone cushion gently flexes and adapts to fit your nipple. It fits 99.98% of nipple sizes\* (up to 30 mm).

## Finding the right teat is important

If your newborn baby is consistently not taking enough milk throughout the feeding sessions or has complications in getting milk, switch to a teat with a higher flow rate. If persistent feeding issues occur, consult a healthcare professional.

## Find the right teat flow

Every baby feeds differently and develops at their own pace. We've designed a range of flow rates so you can find the perfect one for your baby and personalise your bottle. All of the Natural Response Teats are made of soft silicone.

## Sit comfortably

Feel relaxed as you express thanks to a design that lets you sit upright rather than having to lean forwards — clinically proven comfortable expressing position\*. Based on product clinical trial results with 20 participants (2019); 90% of participants find the expressing position comfortable (single electric); 95% of participants find the expressing position comfortable (double electric).

## Personalise to your needs

Finely tune every session to your needs with a wide range of stimulation and expression settings. Our breast pump offers 8 stimulation and 16 expression levels for a personalised experience.

## Express anywhere discreetly

Express whenever and wherever you like thanks to our quiet motor with a slimline design.

## Use easily on the go

Express on the go without having to worry about a power supply. Our rechargeable battery comes with a micro-USB adapter and lasts up to 3 sessions on a single full charge.

## Easy to clean and set up

Our closed expression system means milk stays out of the tubing so there's less to clean. Fewer parts also make it a breeze to put back together again.

# Specifications

## Power

Mains voltage: 100 – 240 V

## Material

Breast pump: BPA free\* (food contact parts only)

## What is included

Travel bag: 1 pcs

Disposable breast pads: 2 pcs
