Highlights

Captures tiny particles

The SaniFilter Plus captures an astonishing 99.9% of ultra fine particles floating in the air inside your car as small as 0.004um, 40X smaller than SARS-causing Coronavirus and 100X smaller than bacteria. Effectively captures microbes from the air passing through the filter *

Stops growth of microorganisms

SaniFilter Plus contains a special antimicrobial layer that inhibits the growth of microorganisms and other airborne contaminants. This stops microbes recirculating through the air you breathe, reducing the likelihood of any bacteria or viruses spreading.
