It is your own responsibility to ensure that the use of the LED retrofit lights complies with applicable local legal requirements.

# LED accessories

## CANbus Adapters

Some car models present particular challenges for LED-based retrofit lamps.

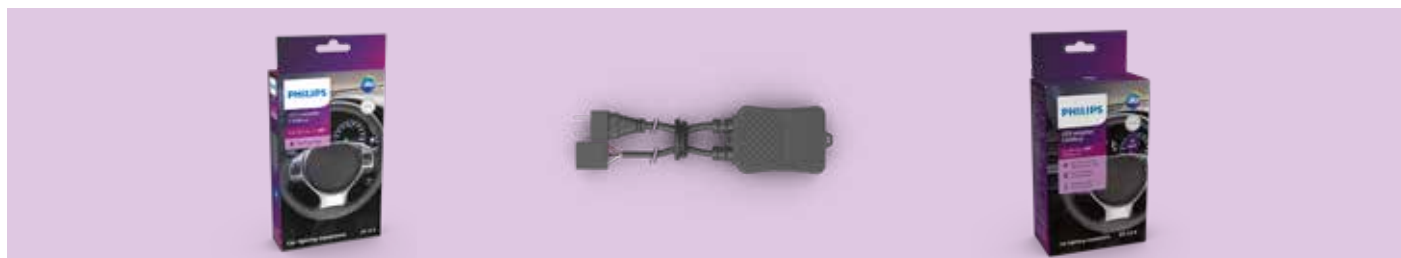

When upgrading your car with LED retrofit bulbs, a few challenges may occur such as an error message on the dashboard, a flickering, or a dimming effect. These error messages don't mean the LED bulb itself is faulty.

### Philips CANbus Adapters:

- Are designed to prevent inaccurate dashboard error messages for vehicles equipped with bulb failure detection.
- Avoid flickering and light-dimming issues.
- Ensure smooth installation of Philips HL-LED bulbs.
- Are EMI compliant on electromagnetic interference.
- Are IP65 ingress protection from dust and water.

## Adapter Rings

Almost every car model has a different type of socket in which halogen bulbs are secured. When replacing your halogen bulbs with LED lighting, you may need a connector ring to secure the LED bulbs inside the headlamp. Every Philips HL [≈H7] upgrade is supplied with a standard center ring. If another type of adapter ring is needed, you can find the concerning ring type mentioned in the Philips application list.

Please contact your nearest Philips dealer to buy the right adapter ring fitting your car model, or contact our Philips Consumer Care.
