

PHILIPS

GoSure 5101

GoSure 5000 series

Stop & Go reminder

Collision detection protection

Smart driver fatigue alert

Sharp high definition images

GS510X1

Your personal guardian on the road

Smart driver alerts keep you safe

With built in Stop & Go alerts, collision detection and driver fatigue warnings, the Philips GoSure 5101 helps you stay safe on the road.

Voice control and automatic operation

- Records automatically when you start the engine
- Focus on driving with smart voice control
- Wireless connectivity for easy operation

High quality image you can rely on

- Full-HD 1600p captures road events in sharp detail
- Captures clear details even in the dark
- 135° wide angle lens records up to three lanes of traffic

Advanced driver alerts for safer journeys

- G-sensor collision detector secures vital video evidence
- Stop & Go reminder helps prevent frustrating accidents
- Automatic driver fatigue warning
- Connects to a rear camera for excellent video coverage

Highlights

Collision detecting G-sensor

Equipped with a 3-axis G-sensor module, the Philips GoSure 5101 detects movement and triggers an emergency recording mode. During a collision that exceeds a certain force threshold, the device will lock that video clip, saving it in a secure folder to prevent it being overwritten.

Records the road automatically

So you never forget to turn on your camera, the Philips GoSure 5101 starts working automatically when you turn the engine on. Likewise, the device switches off automatically when you turn the engine off. So you can always jump in your car, safe in the knowledge that you will capture your entire journey in vivid high definition detail.

Traffic Stop & Go alert

When you're stuck in traffic, it's easy to get distracted and fail to notice the car in front is moving again. With advanced sensors and a spatial awareness algorithm, the Philips GS5101 will detect movement and alert you to the moving traffic in front. This helps you efficiently navigate traffic jams and avoid frustrating accidents.

Smart voice control

When driving you might see something you want to record. But operating the device by hand could be unsafe. With the GoSure 5101 you can ask it to take a picture, or lock the video, simply by talking to it. Voice control allows you to use your camera, while safely focusing on driving.

Driver fatigue alert

Tiredness is a leading cause of road traffic accidents, because a tired driver is a dangerous driver. However, drivers are often unaware they're at an increased risk. A European Union 2018 Fatigue Report found that when driving 2-4 hours, a short rest break will help restore a driver's attention and improve their performance on the road. The Philips GoSure 5101 features an Advanced Driver Assistance System (ADAS), that is able to calculate the hours spent driving.

When the fatigue index gets too high and its time for a rest, the device will alert the driver with a voice message.

Works with a rear camera

When connected to a Philips rear camera RC50, the GoSure 5101 can capture more of the road around you in crisp high definition. With front and rear cameras, you'll reduce blind spots and be more likely to record the crucial evidence you need. Note: Philips rear camera RC50 is sold separately.

Records in sharp HD quality

Poor quality recordings make it hard to see important details. With full High Definition 1600p video capabilities, the Philips GoSure 5101 captures what happens on the road in sharp and vivid detail. So you'll get clear images of the actions of other drivers, including the ability to capture license plate numbers.

Crystal clear night vision

Road accidents often happen at night, so it's vital your camera can cope with low light conditions. With a F2.0 large aperture lens and superior SONY sensor, the GS5101 captures more light, giving you excellent night vision. This means you can drive with confidence at night, knowing you're protected.

Record three lanes of traffic

Capture more of the scene ahead with a proven 135° super wide angle lens for the camera. Philips GoSure 5101 is able to cover up to three lanes of traffic, helping you gain a more complete picture of any incident on the road.

Wireless connectivity via app

With the built-in 2.4GHz Wi-Fi, you can easily live stream your videos onto your smartphone, by connecting to a third party app. With wireless connectivity, it's easy to operate the device from the app.

Specifications

Product description

Aperture Range: F/2.0
Automatic recording
Date and time stamp
Designation: GoSure 5101
Driver fatigue alert
Emergency file protection
External memory: SD card(class 10, Up to 64GB)
File Format: .MP4, H.264 video compression
Fixed Lens: 135° super wide angle
G-sensor
Image Sensor: SONY IMX335 CMOS sensor
Interface: Micro USB, Microphone, Speaker, Micro SD slot, Mini USB
Internal Memory: SPI Nor flash 8MB
Languages: English
Operating Temperature: -10 °C ~ 60°C
Power [W]: <3W
Random Access Memory: 2Gb DDR3
Seamless loop recording
Storage Temperature: -20°C ~ 70°C
Video resolution: 2K 1600P
Voltage [V]: 12
Stop & Go reminder
Collision detection

Ordering information

Order entry: GS510X1

Logistic data

Quantity in box: 10
EAN1: 6974260727516
GOC: 72751630

Accessories included

Accessories: Power cable
Power cable length: 3.6 m

Weight and dimensions

Product dimensions (L x W x H): 90 x 84 x 42 mm
Box weight (incl. product) (g): 360
Product weight (g): 170

Packaging Data

EAN1: 6974260729794
EAN3: 6974260729800
12NC: 928599920604

Packed product information

Length: 16 cm
Width: 16 cm
Height: 6 cm
Net weight per piece: 290 g
Pack Quantity: 1
MOQ (for professionals): 10
Gross weight individual pack: 290 g

Outerpack information

Length: 81 cm
Width: 16 cm
Height: 17 cm
Gross weight [kg]: 3.32
