- Record your performance. USB and TF card slots
- Easy control. Clear LED display

Take the party with you

- Philips Entertainment app. Control the party vibe
- Ready to roll with built-in handle and wheels
- AC-powered

Highlights

130 W RMS. Big bass

With 130 W of powerful sound, this Bluetooth party speaker can fill the room with beats! Two 12" woofers, a 3" midrange driver, and a 4" tweeter bring you clear voices, rocking guitars and synths, and pumping bass. Plus, you can wirelessly connect extra party speakers for even bigger sound.

RGB LED speaker lights

Light up your space and vibe to the music! When the tunes are pumping, a rainbow of colorful lights shimmer and pulse on the surface of the speaker's bass woofers, midrange driver, and tweeter. With nine light modes to choose from, you can create a multicolored lightshow like no other.

DJ effects on board

Hype the crowd with DJ effects like record-scratch sounds, air horns, and beat breaks. There are six effects, which you can allocate to three

preset buttons: a short or long press on each button activates a different effect. Use the Philips Entertainment app to allocate effects to different buttons.

Mic and guitar inputs

Two mic inputs and a 6.5 mm guitar input let you sing and play like a superstar. Mics and guitar get their own volume dials on the speaker, and you can add echo effects too. Want to lay down some tracks to impress your friends? You can record your performance to a USB device or TF card.

Bluetooth, audio-in, USB, FM

Stream playlists via Bluetooth. Plug in other sources via audio-in, USB, or TF card—or tune in to FM radio stations. Rotary knobs on the speaker let you select the source or even fine-tune the bass and treble. Don't want to get up? There's always the remote control.

Philips Entertainment app

Download the app and you can use your smart device to control the speaker's on-board lightshow and allocate DJ presets, as well as play, pause, or skip tracks—and adjust the speaker's bass, treble, and volume. In charge of the karaoke? You can use the app to control treble and bass on the mic inputs, and control vocal effects.

Wheels and handle

The speaker's built-in handle and wheels mean you can play wherever you can find an AC socket. Roll up to a friend's house. Set up on a patio with an outdoor power outlet. You can skip tracks and turn the volume up directly from the speaker.

Specifications

Sound

Output power (RMS): 130W

Sound enhancement: treble and bass control,
Dynamic Bass Boost

Frequency response: 20Hz - 20kHz, ± 3 dB

Output power (MAX): 260W
