Designed to help healthy oral development

Developed with leading orthodontist Dr. Hagemann

Philips AVENT advanced orthodontic teat is designed to help healthy oral development. All our soothers are made from silicone and are taste and odour-free. Colours are subject to change.

Orthodontic teat

- Shaped teat
- Unique "wings"

Hygiene

- Snap on hygienic cap
- Can be sterilised
- Dishwasher Safe

Odourless and taste-free

- User-friendly silicone teats

Highlights

Shaped teat

The teat is shaped to let baby's tongue remain in a natural position.

Snap on hygienic cap

To keep sterilised teats hygienic.

Unique "wings"

Advanced orthodontic teat with unique wings that minimise the pressure on gums and developing teeth. The wings make the teat wider so that the pressure that is caused by baby's suckling is distributed more evenly, resulting in less pressure per tooth.

User-friendly silicone teats

The Philips Avent silicone teat is taste-free and odour-free so it's more likely to be accepted by your baby. The silicone is smooth, transparent,

easy to clean, and it doesn't get sticky. The teat is strong, long-lasting, and won't become misshapen or discoloured over time.

Can be sterilised

Can be sterilised
