Reverse osmosis filtration

Ambient, hot, chilled

6L tap water tank

ADD6922CG

RO, hot, cold, and ice-making all in one!

The all-round dispenser integrates RO purification, heating, cooling, and ice-making in one. You can enjoy a bucket of pure-tasting ice, and purified water with minerals from 5°C to 100°C on demand.

Cleaner water assured

- Aquaporin Inside technology filters water better than before
- Adds minerals back into the water to enhance the taste
- Static UV disinfection inhibits bacteria growth
- Real-time water quality display gives you extra assurance

Your Drinks, Your way

- Fresh boiling hot water on demand within seconds
- Perfectly chilled water and crystal ice on demand
- 6 temperature settings for your different needs
- Commonly-used volume settings at the touch of a button

Build for your convenience

- Portable purified water jug
- Plug and play; no installation required
- Large tap water tank avoids frequent water refill

Worry-free to use and maintain

Highlights

Aquaporin Inside[®] technology

Harnessing the power of nature, the biomimetic reverse osmosis membrane incorporates aquaporin proteins to replicate nature's own water filtration process and filters water faster and better than ever before. The filtration system can effectively remove 110 kinds of harmful substances down to 0.0001 micron*, providing you and your family with clean and fresh-tasting water.

Mineralization technology

Mineralization technology enhances purified water with beneficial minerals such as Ca, and Mg, refining the water taste.

Static UV disinfection

The built-in UV-C LED disinfection activates automatically every hour and inhibits bacteria growth in the cooling water tank by up to 99.9%**.

Water quality display

Thanks to the water quality display, you can be confident about the water you and your family drink.

True boiling instant heating

The fresh hot water comes out within seconds, at the exact temperature you like, bringing out the maximum aroma in your drinks. Different from other instant heating dispensers, our special design achieves true boiling in the heating element, giving you extra hot water.

Compressor cooling

Thanks to the highly efficient compressor cooling system, you can easily enjoy the perfectly chilled water like it's straight out of the fridge. It also enables fast ice-making - a new batch of ice cubes can be made every 8 minutes.

6 temperature settings

We provide pure-tasting water from ambient to piping hot. Tea, coffee, baby formula. You can do a million things with it.

Commonly-used volume settings

You can always find a suitable water volume to fill your cups, mugs, bottles, or even jugs.

Portable purified water jug

Thanks to the design of the portable purified water jug, you always have plenty of pure-tasting water to carry around for cooking and making drinks. You can even chill one jug with filtered water in the fridge for cold drinks, and keep the other jug placed in the water station for refilling.

Installation free

The dispenser will start to work as soon as you connect the power and turn it on. No need to plumb in.

Large tap water tank

6L large water tank is perfect for family use, without the need of refilling it frequently.

Filter replacement reminder

The filter lifetime indicator reminds you to replace the filter on time, to ensure the best filtration performance.

Long filter lifetime

The RO filter is good for filtering 2,000 liters of water, helping to save thousands of plastic bottles every year. So it's not only good for you, it's good for the environment too.

Anti-burn

When there is little/no water left, the system automatically prevents hot water from dispensing, protecting the system from dry burn.

Self-cleaning mode

After you return from holiday, simply activate the self-cleaning mode to rinse the water pipes with hot water, so that you feel more confident about the hygiene of the system.

BPA-free

All parts that come into direct contact with water are made of BPA-free materials.

Eco-friendly

Bottled water takes a significant toll on the environment, and also costly. With this water filtration system, you never need it again - you always have access to clean and fresh-tasting water.
