Highlights

OLED display for deeper blacks

Most TVs have backlights that dim in zones, however, every single pixel on our OLED TV (all 8+ million of them) can dim to complete black.

4K UHD OLED Wide Gamut Display

The latest OLED technologies result in the widest color gamut with visibly deeper and richer colors, up to 98.5% DCI-P3

Dolby Vision IQ and HDR10

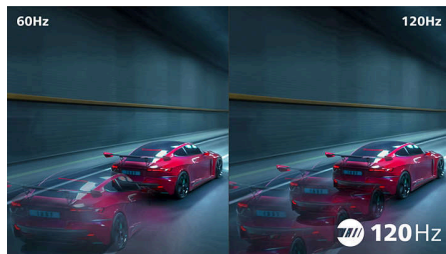

Dolby Vision IQ dynamically adjusts and optimizes picture settings as room lighting conditions change guaranteeing the best viewing experience

AMD FreeSync Premium

AMD FreeSync Premium eliminates choppy gameplay and broken frames with fluid, artifact-free visuals with support for 4K UHD gaming.

120 Hz native resolution

Smoother motion overall, especially for games and movies. Movies are shot in 24 fps and since 120 Hz is a multiple of 24, motion jutter is minimized.

Dolby Atmos w/2.1 speakers

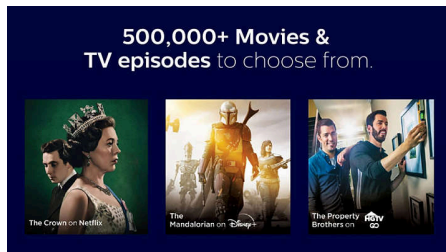

Revealing depth, clarity and details like never before, Dolby Atmos is a sound experience that lets you feel games, shows, and music all around you.

Remote with voice control

Power up your TV, adjust the volume, and control your streaming just by speaking. Use your voice to quickly search, play entertainment, and more.

#1 smart TV platform in North America

Get more from your TV. Choose from a large selection of entertainment across popular streaming services.

Sleek borderless design

With an elegant stand and 3-sided borderless display, enhance the look of any room with this sleek TV.
