Highlights

Ear-cuff style open earbuds

These open earbuds clip on lightly but securely to your outer ear and a flexible joint lets you adjust the grip for maximum comfort. Precision air-conduction drivers direct sound into your ear canal without sealing it, so you'll hear what's going on in your immediate surroundings too.

28 hrs play time (7 + 21)

You get 7 hours play time from a full charge, and an extra 21 hours from the case. If you need a quick boost, pop the earbuds back in the case for

15 minutes to get an extra hour. It takes 2 hours to recharge the earbuds fully, and mono mode lets you use one earbud at a time while the other one charges.

Bluetooth 5.4 multipoint

Advanced Bluetooth connectivity gives you a more stable connection for seamless streaming, and you can connect to two Bluetooth devices at

the same time. Enjoy that playlist or listen uninterrupted to your favorite podcast without annoying dips in the sound.

Responsible design

We're continually working to make our supply chain more sustainable and transparent. Our plastic-free packaging uses FSC-certified recycled cardboard and soy-based ink.

IPX4 splash/sweat resistant

With their featherlight design, comfortable fit, and an IPX4 rating, these true wireless open earbuds are ready for everyday use. Fully splash resistant, they won't mind a little sweat and you don't need to worry about getting caught in the rain.

Clear calls

Your voice will come through clearly when you're on a call. A dedicated mic picks up the sound of your voice while a noise-reduction algorithm quietsens some of the background noise from the world around you.

On-ear controls

There are handy button controls on the earbuds for playback, volume, and calls. Prefer to use the left or right earbud? You can customize how these controls are set up via the Philips Headphones companion app.

Philips Headphones app

As well as customizing the on-ear controls, you can use our Headphones app to get the latest firmware updates, manage connected devices, or find a missing earbud. There's an in-app equalizer too.
