

PHILIPS

Interventional
Applications Workspace

IntraSight

Service

Superior service. Secure coverage.

Maximize your image-guided therapy investment

Philips Interventional Applications Workspace – IntraSight – unites proven, best-in-class physiology, imaging, and co-registration¹ tools on a single workspace.* It is the first interventional workspace to run on Microsoft Windows 10, providing the latest data encryption and protection against cybersecurity threats.

With IntraSight, we now offer three new service programs to choose from – RightFit Protection, RightFit Planned Maintenance, and Technology Maximizer Plus. The IntraSight workspace enables Philips Remote Services (PRS), a remote diagnostics tool already offered with other Philips systems. This capability improves remote troubleshooting and corrective action planning, ultimately improving uptime. Our new Technology Maximizer³ service program provides ongoing software and hardware upgrades to keep your system state of the art. Keep your system the most secure with RightFit Protection and Technology Maximizer Plus.

IntraSight service program options

Service programs	Planned maintenance	Parts and labor	Upgrades
RightFit Planned Maintenance Keep compliant with CMS and Joint Commission	●		
RightFit Protection Gain peace of mind for your system	●	●	
RightFit Protection and Technology Maximizer Plus Maximize your investment	●	●	●

A great service experience starts here

RightFit Planned Maintenance Compliance with CMS guidelines²

CMS guidelines require “imaging and radiologic equipment whether used for diagnostic or therapeutic purposes must be maintained per manufacturer’s recommendations”. Our service agreements include Philips’ recommended annual planned maintenance procedure.

RightFit Protection Peace of mind for your system

With Philips RightFit Protection service agreement, the entire system is covered, including all cables and optional components, (e.g PIM, PIMr, BUB, etc.). By purchasing a service agreement you have an expense you can budget, protecting you against unforeseen costs.

RightFit Protection and Technology Maximizer Plus Maximize your investment

Your IntraSight is full of new performance advances from the first case. You can keep upgrading it over its useful life with Technology Maximizer Plus for a reasonable, predictable fee.

For five years after installation, we will deliver a minimum of three major upgrades (two software, one hardware). Purchasing these upgrades individually could cost up to twice as much as the image-guided therapy Technology Maximizer Plus agreement alone.

Please see your Philips sales representative for more information.

*IntraSight workspace is offered on both integrated and mobile platforms.

1. Co-registration tools available within IntraSight 7 configuration via SyncVision.
2. Governed by 42 CFR 482.26 (b)(2) CMS Reference: S&C: 14-07-Hospitals
3. Technology Maximizer Plus can be purchased separately from other service agreements.
