Extra gentle for sensitive skin

Extra-firm teat for growing teeth and gums

Premium care for sensitive skin with flexible shield. 9 of 10 parents agree: baby has no skin irritation after starting to use ultra soft soother.** Soothing relief is always near, no matter who cares for baby. Now 80% plant-based.*

For your baby's sensitive skin

- Soft, flexible shield reduces irritation**
- Orthodontic teat designed for natural oral development
- Extra-firm teat for healthy teething
- Designed with healthcare professionals and parents

Convenient, safe and now more eco-friendly

- Kinder to the planet with 80% plant-based materials*
- Sterilising carrying case for fast, easy hygiene

Highlights

Soft, flexible shield

Baby's skin needs extra care. Soft shield technology follows the natural curves of your baby's face, so they experience fewer skin marks and less irritation**. Our rounded shield minimises pressure on the cheeks for extra gentleness.

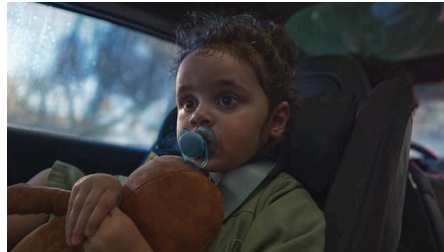

Orthodontic silicone teat

Our orthodontic teats are designed using soft silicone to support natural mouth muscle movements to help lower the risk of malocclusion. The narrow neck teat is designed to reduce pressure between the tongue and palate. Philips Avent ultra Soothers are independently accredited by the Oral Health Foundation. Made from 100% food-grade silicone, they are more durable and long-lasting

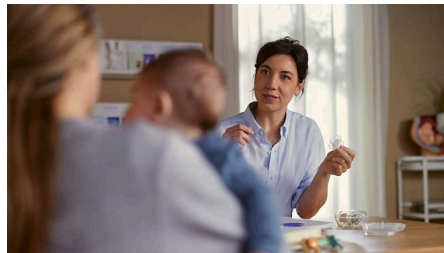

than rubber (latex) teats and are free from BPA, BPS, phthalate, PVC and polycyclic aromatic hydrocarbons.

Extra-firm teat

Our soothers are designed to facilitate natural tongue positioning, which is important for healthy speech development as your baby grows. Extra-firm, to comfort baby during teething days. Our textured silicone teat is designed to mimic the feel of mum's breast.

Designed with experts

We worked closely with parents and healthcare professionals to develop the unique design of Philips Avent ultra soft soothers.

80% plant-based*

More sustainable choices let you give the best care with less impact on the planet. The full Philips Avent ultra range features soothers and sterilising cases made using 80% plant-based materials.*

Sterilising carrying case

The carrying case doubles as a steriliser so that soothers are always ready when you need them. Just add water and microwave for 3 minutes for easy sterilisation that generates up to 50% less CO2 emissions.***
