Lets your little one's skin breathe

Easy to find in the dark

Soothing and breathable with large airholes. 9 out of 10 parents agree: Philips Avent ultra air soothers are comfortable for my little one.** And they glow in the dark, so comfort and relief are always easy to find. Now 80% plant-based.*

Designed for comfort

- Extra-large airholes let baby's skin breathe
- Orthodontic teat designed for natural oral development
- Extra-firm teat for healthy teething

Convenient, safe and now more eco-friendly

- Kinder to the planet with 80% plant-based materials*
- Sterilising carrying case for fast, easy hygiene

Your ally at night

- Supports sleep routines for healthy development
- Glows in the dark long after lights-out

Highlights

Extra-large airholes

Holes in the shield ventilate your baby's skin, keeping it drier for ultimate soothing comfort.

Orthodontic silicone teat

Our orthodontic teats are designed using soft silicone to support natural mouth muscle movements to help lower the risk of malocclusion. The narrow neck teat is designed to reduce pressure between the tongue and palate. Philips Avent ultra Soothers are independently accredited by the Oral Health Foundation. Made from 100% food-grade silicone, they are more durable and long-lasting than rubber (latex) teats and are free from BPA, BPS, phthalate, PVC and polycyclic aromatic hydrocarbons.

Extra-firm teat

Our soothers are designed to facilitate natural tongue positioning, which is important for healthy speech development as your baby grows. Extra-firm, to comfort baby during teething days. Our textured silicone teat is designed to mimic the feel of mum's breast.

Supports sleep routines

8 out of 10 parents say that Philips Avent ultra soothers help their baby fall asleep.**

Glow in the dark

The cap of the soother gently glows in the dark, so it is easier to find your baby's soother when the lights go out.

80% plant-based*

More sustainable choices let you give the best care with less impact on the planet. The full Philips Avent ultra range features soothers and sterilising cases made using 80% plant-based materials.*

Sterilising carrying case

The carrying case doubles as a steriliser so that soothers are always ready when you need them. Just add water and microwave for 3 minutes for easy sterilisation that generates up to 50% less CO2 emissions.***
