Lets your little one's skin breathe

Extra-large airholes for more comfortable soothing

Soothing and breathable with large airholes. 9 out of 10 parents agree: Philips Avent ultra air soothers are comfortable for my little one.** Soothing relief is always near, no matter who's taking care of baby.

Designed for comfort

- Extra-large airholes let baby's skin breathe
- Orthodontic teat designed for natural oral development
- Loved by babies with a 98% teat acceptance***

Now more eco-friendly

- Kinder to the planet with plant-based materials*

Highlights

Extra-large airholes

Holes in the shield ventilate your baby's skin, keeping it drier for ultimate soothing comfort.

Orthodontic silicone teat

Our orthodontic teats are designed using soft silicone to support natural mouth muscle movements to help lower the risk of malocclusion. The narrow neck teat is designed to reduce pressure between the tongue and palate. Philips Avent ultra Soothers are independently accredited by the Oral Health Foundation. Made from 100% food-grade silicone, they are more durable and long-lasting than rubber (latex) teats and are free from BPA, BPS, phthalate, PVC and polycyclic aromatic hydrocarbons.

98% teat acceptance

Our textured silicone teats are designed to mimic the feel of mum's breast. When we asked parents how their little ones respond to them, an average of 98% said their babies accept Philips Avent ultra soft soothers.

Kinder to the planet

More sustainable choices let you give the best care with less impact on the planet. The full Philips Avent ultra range available from retailers features soothers and sterilising cases made using 80% plant-based materials.*
