- Loved by babies with a 98% teat acceptance***

Convenient, safe and now more eco-friendly

- Kinder to the planet with 80% plant-based materials*
- Sterilising carrying case for fast, easy hygiene

Your ally, day and night

- Glow-in-the-dark version to find in the night

Highlights

Extra-large airholes

Holes in the shield ventilate your baby's skin, keeping it drier for ultimate soothing comfort.

Orthodontic silicone teat

Our orthodontic teats are designed using soft silicone to support natural mouth muscle movements to help lower the risk of malocclusion. The narrow neck teat is designed to reduce pressure between the tongue and palate. Philips Avent ultra Soothers are independently accredited by the Oral Health Foundation. Made from 100% food-grade silicone, they are more durable and long-lasting

than rubber (latex) teats and are free from BPA, BPS, phthalate, PVC and polycyclic aromatic hydrocarbons.

98% teat acceptance

Our textured silicone teats are designed to mimic the feel of mum's breast. When we asked parents how their little ones respond to them, an average of 98% said their babies accept Philips Avent ultra soft soothers.

Glow-in-the-dark version

We've got you covered day and night. The cap of the glow-in-the-dark version gently glows so you can find it without turning on the lights.

80% plant-based*

More sustainable choices let you give the best care with less impact on the planet. The full Philips Avent ultra range features soothers and sterilising cases made using 80% plant-based materials.*

Sterilising carrying case

The carrying case doubles as a steriliser so that soothers are always ready when you need them. Just add water and microwave for 3 minutes for easy sterilisation that generates up to 50% less CO2 emissions.***
