Soothing newborns from day one

Little and light for a fit that's just right

Peace of mind right from the start. Philips Avent ultra start soothers are made to fit newborns' mouths and can be safely used until 6 months. Comfort and relief are always near, no matter who's taking care of baby. Now 80% plant-based.*

Convenient, safe and now more eco-friendly

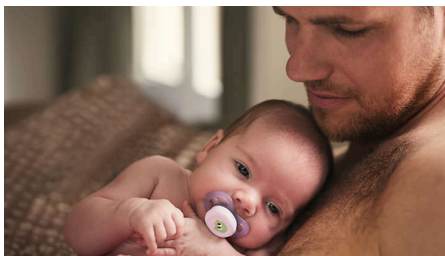

- Kinder to the planet with 80% plant-based materials*
- Sterilising carrying case for fast, easy hygiene

Made for your little one

- Just the right fit for tiny mouths
- Orthodontic teat designed for natural oral development
- Loved by babies with 98% teat acceptance**

Highlights

Extra little and light

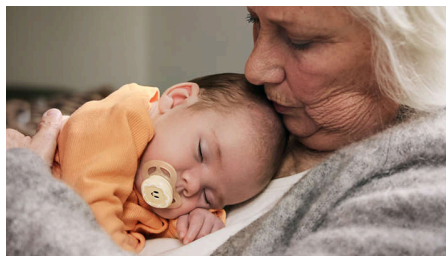

Our newborn soother is specially designed to fit tiny mouths and faces. Its lightweight, ringless design makes it an ideal first soother, and it's suitable for babies up to 6 months old. The teat shape and size help your baby transition easily to our Philips Avent ultra air and ultra soft soother ranges, so their natural suckling needs are always met.

Orthodontic silicone teat

Our orthodontic teats are designed using soft silicone to support natural mouth muscle movements to help lower the risk of malocclusion. The narrow neck teat is designed to reduce pressure between the tongue and palate. Philips Avent ultra Soothers are independently accredited by the Oral Health Foundation. Made from 100% food-grade silicone, they are more durable and long-lasting than rubber (latex) teats and are free from BPA, BPS, phthalate, PVC and polycyclic aromatic hydrocarbons.

98% teat acceptance

Our textured silicone teats are designed to mimic the feel of mum's breast. When we asked parents how their little ones respond to them, an average of 98% said their babies accept Philips Avent ultra soft soothers.

80% plant-based*

More sustainable choices let you give the best care with less impact on the planet. The full Philips Avent ultra range features soothers and sterilising cases made using 80% plant-based materials.*

Sterilising carrying case

The carrying case doubles as a steriliser so that soothers are always ready when you need them. Just add water and microwave for 3 minutes for easy sterilisation that generates up to 50% less CO2 emissions.***
