Supports baby's individual drinking rhythm

A nipple that works like a breast

The ideal giftset to feed&comfort your baby with a pop of color. With Natural Response Nipple babies can drink at their own rhythm like on the breast, easy to combine breast and bottle feeding. Finding the right nipple is important. See below.

Easy to combine breast and bottle feeding

- Natural latch on with breast-shaped nipple
- Nipple releases milk when baby actively drinks

Other benefits

- Same products, new navigation
- Choose the right teat flow for your baby
- No-drip teat design prevents spills and lost milk
- Compatible across the Philips Avent range
- Easy to hold even for little hands
- Natural Response Teats and Bottles are BPA free*
- ultra air pacifier, for your baby's sensitive skin
- Be patient as baby adjusts
- Simple to use, easy to clean and quick to assemble

Vents air away from your baby's tummy

Finding the right teat is important

Highlights

Natural Response Nipple

The Natural Response Nipple works with your baby's natural feeding rhythm, making it easy to combine breast feeding and bottle feeding. The nipple has a unique opening which only releases milk when the baby actively drinks. So when they pause to swallow and breathe, the milk pauses too.

Find the right teat flow

Every baby feeds differently and develops at their own pace. We've designed a range of flow rates so you can find the perfect one for your baby and personalise your bottle. All of the Natural Response Teats are made of soft silicone.

Same products, new navigation

We have moved to a pace-based flow navigation system. Start with the teat that comes with the bottle. Try a lower flow if milk is leaking from your baby's mouth or your baby is gulping. Try a higher flow if your baby is playing with the teat

instead of drinking or seems frustrated. As we make this change, you may receive either style of pack.

Finding the right teat is important

If your newborn baby is consistently not taking enough milk throughout the feeding sessions or has complications in getting milk, switch to a teat with a higher flow rate. If persistent feeding issues occur, consult a healthcare professional.

Anti-colic valve

Anti-colic valve is designed to keep air away from baby's tummy during feeding, to help reduce colic and discomfort.

No-drip teat

The teat opening is designed to release milk only when the baby is feeding. So you can confidently avoid milk loss whether at home or on the go.

Simple to use and clean

Wide bottle neck makes filling and cleaning easy. Only a few parts for quick and simple assembly.

Easy to hold

The ergonomic bottle is easy to grip at any angle to give maximum comfort during feeding. Easy for your hands and tiny hands to hold.

Be patient as baby adjusts

Our new Natural Response Baby Bottles are different from free-flow baby bottles. Just like breastfeeding, it could take a few tries to get it right. That's perfectly natural.

Highlights

Natural latch on

The wide, soft and flexible nipple is designed to mimic the shape and feel of a breast, helping baby to latch on and feed comfortably.

Compatible across the range

Mix and match our breast pump, bottle and cup parts and create the product that works for you, when you need it.

ultra air pacifier

Soothe your baby with a pacifier that lets their skin breathe. The Philips Avent ultra air has extra large holes to keep skin dry. Its light weight shield is designed for maximum air flow.

BPA-free*

The Philips Avent Natural Response bottles and teats are made of BPA free* material. Plus, all the Natural Response teats are made out of soft silicone.
