Smart life

Safety under control in the age of IoT

Enjoy the extreme convenience brought by the intuitive fingerprint verification, full auto switch, and infrared sensor. Link with IoT gateway and smart door viewer makes security assured at your fingers.

Extraordinary design brings outstanding experience

- Unlock swiftly at one go

Life is more than convenient

- Unlocking once detects the hand
- Enjoy the reassurance after closing the door

Smart life lock with excellence

- better security assured by IoT
- Provides linkage to future life

Multiple protection in one for overall home safety

- Instant alert upon inside unlocking
- Protect your password security in real time
- Higher lock reliability and better home security
- Care more about safety of children and pets

Highlights

Auto locking

Automatic locking

Philips 9300 push-pull smart door lock employs full automatic mortise. Without the need for any extra action, the deadbolt will spontaneously pop up after closing the door. If the door is not locked up, the mortise will give an alert to remind you of the door lock status.

C-grade lock cylinder

C-grade lock cylinder

The lock cylinder is the key component that controls the opening of the lock. The C-grade lock cylinder employs multiple anti-theft technologies with a unique design of pin tumbler and vane structure, that can provide high deterrence against technical lock-picking.

Functional buttons

Functional buttons

[Open]: Double click the button within one second could unlock the door, which prevents accidentally unlocking by children and pets effectively. [Close]: Click once on the button could lock the door. Long pressing the button could enable inside deadlock. You could use the master PIN code or mechanical key to disable inside deadlocking. Simultaneously press the [Open] and [Close] buttons could enable or disable the inductive unlocking function.

Gateway & smart door viewer*

Link with smart door viewer

You can remotely view unlocking records and distribute a one-time PIN code at any time via the gateway. The smart door viewer will take photos or videos, then upload them to the App under the abnormal alert, when it is binding with the door lock, so that users could get to know various situations from the inside and outside of the door.

Hidden PIN code

Fake PIN Code

Features with hidden PIN code technology, Philips smart door lock allows you to enter any random number combinations to successfully get identified as there is consecutive input of the correct password. This feature can effectively prevent peeping and disclosing your real password.

Indoor infrared sensor

Indoor infrared sensor

Features with the touch sensor and infrared sensor, when touching the touch sensor and the infrared sensor detects an obstruction, the door will be unlocked.

Instinctive fingerprint

Semiconductor fingerprint sensor

The fingerprint sensor is integrated with the push-pull handle so that when you hold the handle, your finger will naturally fall on the sensor. You can simply reach out and touch the sensor, then push to open after a successful fingerprint verification. The one-step unlocking feature will bring you a fast and convenient door opening experience.

Outside forced lock

Outside forced lock function

Before leaving home, you can enable the outside forced locking by touching the functional button, under which mode, opening from the inside will trigger an alert. This feature can effectively remind you of security risks and upgrade the level of home security.

Wireless network extension

Wireless network extension

With the connection to the wireless network, you can remotely manage the access of door locks, monitor the status of door locks in real-time, view the access logs at any time, and achieve personalized management of smart door locks.

Specifications

Design & Appearance

Color: Obsidian black

Handle: Push-pull handle

Main Material: Zinc alloy

Surface Processing: Electroplating

Fingerprint Sensor: Semiconductor

Emergency Escape Design: Indoor fast opening mortise

Ergonomic Design: Push-pull handle design

Access Solution

Fingerprint

Password/PIN Code

Card/Key Tag

Mechanical Key

Bluetooth

Lock Capacity

Fingerprint: Up to 100

Card/Key Tag: Up to 100

Master PIN Code: 1

User PIN Code: Up to 10

One-time PIN Code: 1

Power Specification

Power Supply: 4 AA batteries

Battery Type: Alkaline Batteries

Time of Use: 10 months*

Maximum Batteries Capacity: 8 batteries

Emergency Power Supply: 5V power bank

Working Voltage: 4.5-6V

Easy Operation

Indicator: Door locks status prompt, Low battery prompt, Mute status prompt, Outside forced lock prompt, System locking prompt

Voice Guide: Human voice guide

Smart Lock Functions

Mortise: Full auto mortise

Locking Function: Electronic deadlock, System locking

Safety Function: Dual verification, Fake PIN code, Outside forced lock function, Safe handle function

Alarm Function: Anti-prying alarm, Outside forced lock alarm

Mode

Operation Mode: Auto mode, Manual mode

System Setup Mode: Dual verification mode, Normal mode

Installation

Door Thickness: 38-60 mm, 60-90 mm, 90-120 mm, Other range*

Door Opening Direction: Left inward opening, Left outward opening, Right inward opening, Right outward opening

Door Type: Antitheft door, Copper door, Wooden door

Multi-lock Point: No
