Piping hot purified water straight from the tap

1200GPD super purified water flow rate

Your Drinks, Your way

- 5 temperature settings for your different needs
- Fresh hot water on demand within seconds
- 1200GPD ambient water flow rate
- Check your filtration system without opening the cabinet
- No more re-boiled or keep warm; less energy consumption
- BPA-free

Highlights

5 temperature settings

We provide pure-tasting water from ambient to piping hot. Tea, coffee, baby formula. You can do a million things with it.

Hot water within seconds

The fresh hot water comes out within seconds, at the exact temperature you like, bringing out the maximum aroma in your drinks.

1200GPD

The system offers a purified water flow rate of 1200 gallons for ambient water, thereby meeting the demands of a big family for clean drinking water. Furthermore, the water flow is fast - filling up a glass of water in less than 3 seconds!**

Smart faucet

With the smart faucet, you can check the water quality and filter status at a glance. No need to bend your knees and open the cabinet.

Energy saving

The water is heated right at the moment you need, and at the exact volume you choose. No more re-boiled or keeping warm, saving much more energy than boiler technology.

BPA-free

All parts that come into direct contact with water are made of BPA-free materials.

Specifications

Filtration performance

Chlorine reduction

Filter Precision: down to 0.0001 microns

Microplastics reduction

Bacteria reduction

Pesticides reduction

VOC reduction

Viruses reduction

Heavy metals reduction

Filtration mode: Purified water only

Total dissolved solids (TDS) reduction

PFOA reduction

PFAS reduction

Filter specifications

Filtration capacity: 4000L

RO membrane specifications: 100 GPD RO membrane

Stage of filtration: 5-stage

Filter lifetime: CP filter: up to 12 months, RO filter: up to 36 months, RO filter: up to 36 months, GAC filter: up to 12 months

General specifications

Replacement filter cartridge: AQP filter- AUT822/96, CP filter- AUT821/96, GAC filter- AUT823/96

Product Dimension (LxWxH): 417*185*390 mm

Rated Water Flow Rate: 0.26L/min

Inlet water temperature: 5-38°C °C

Drain water ratio: 65% (2:1)

Inlet water pressure: 0.1-0.4 MPa

Applicable inlet water: Municipal tap water

Water storage tank: 8L capacity

Pressure booster pump: Included

Faucet: With TDS display and filter lifetime reminder

Heating system: Instant heating

Voltage: 220V

Rated power: 2200W
