Highlights

Mimics baby's drinking rhythm

Babies know how to drink best! That's why our hands-free electric breast pump mimics their natural drinking rhythm - so you can find your own rhythm for effective* expression and optimal milk output. The right size breast shields and shield inserts support your expression with a secure and comfortable fit every step of the way.

Unique SkinSense shields

Our unique SkinSense silicone breast shields are designed for ultimate comfort, softly shaping around your breasts using your body's natural warmth. The breast shields are made with food-grade silicone for complete peace of mind.

Transparent collection

The see-through collection cups provide an unobstructed view inside. They help you correctly place your nipples for your best milk

output, and visually track the volume of breast milk. For confident pumping from the first drop until finish.

Ultra-light collection cup

One collection cup weighs just a little over 100 grams when empty - up to 3x lighter than a fully wearable breast pump. The cups sit comfortably in-bra with barely a sign they're there.

Nipple sizing card

Use the nipple sizing card to find your ideal size of breast shields - and shield inserts if you use them. Measuring only takes a moment and with a range that fits 99% of moms, we have your comfortable and secure fit covered.

Easy to clean and assemble

We designed our pump and accessories to be as simple as possible. With only a few connecting pieces, each collection cup is a breeze to take apart, clean (by hand or in a dishwasher), disinfect and put back together.

Extra compatibility

These Hands-free Collection Cups can be used with the Philips Avent Premium Electric Breast Pump, Advanced Electric Breast Pump, and Hands-free Electric Breast Pump. Switching cups takes seconds, the benefits go on.

Fits 99% of all moms

We support every mom to feel their best and having the right fit is an essential part of that. This starter set includes our full range of breast shields and shield insert sizes, fitting 99% of moms for ultimate comfort while pumping.
