Highlights

Soft and adaptive silicone cushion

Soft and comfortable petal-shaped silicone massage cushion; gently stimulates milk flow while massaging the breast. It brings together gentle compression and suction to trigger fast let down.

Ergonomic handle design for easy expression

With easy expression handle designed ergonomically, you can pump at your own pace and decide on your own rhythm simply by adjusting the vacuum level by pressing the handle at your own intensity.

Lightweight and compact design

Pump easily anywhere, any time with its compact and lightweight design, you can carry it in your bag anywhere you go. You can directly pump into Avent feeding bottles as the expression kit is compatible.

Easy to clean and set-up

Designed for effortless use, featuring easy assembly, disassembly, and cleaning with its minimal, user-friendly parts. The dust cap will help to keep your breast pump clean and free from dust and dirt.

BPA free*

Made of durable and safe materials with 0% BPA.*
