Supports baby's individual drinking rhythm

A teat that works like a breast

The ideal gift set to feed and comfort your baby with a pop of colour. With the Natural Response Teat babies can drink at their own rhythm like on the breast, making it easy to combine breast and bottle feeding.

Easy to combine breast and bottle feeding

- Natural latch on with breast-shaped teat
- Teat releases milk when baby actively drinks

Other benefits

- Choose the right teat flow for your baby
- ultra soft soother, for your baby's sensitive skin
- Glows for easier nighttime feeds
- Enough glow for one full feed
- No-drip teat design prevents spills and lost milk
- Compatible across the Philips Avent range
- Easy to hold even for little hands
- Natural Response Teats and Bottles are BPA free*
- Be patient as baby adjusts

Vents air away from your baby's tummy

Finding the right teat is important

Highlights

Natural Response Teat

The Natural Response Teat works with your baby's natural feeding rhythm, making it easy to combine breast feeding and bottle feeding. The teat has a unique opening which only releases milk when the baby actively drinks. So when they pause to swallow and breathe, the milk pauses too.

Natural latch on

The wide, soft and flexible teat is designed to mimic the shape and feel of a breast, helping the baby to latch on and feed comfortably.

Finding the right teat is important

We all learn at our own pace. Suckling is a skill and some babies develop it quicker than others. That's why some babies might initially benefit from our "First Flow" teat (Teat 0) before progressing to the Natural Response teats. Switch to the "First Flow" teat when your baby takes longer than 20 minutes to drink 50 ml/ 1.7 oz using the Natural Response teats. Try a Natural

Response teat with a higher flow rate if your baby is playing with the teat instead of drinking or seems frustrated. If feeding difficulties persist, consult a healthcare professional.

Glow-in-the-dark ring

The glow-in-the-dark ring accessory provides a soft glow to help you feed your baby and follow their progress as peacefully as possible, even in low light.

Long-lasting glow

Charged by indoor light or daylight, the glow ring only takes one hour to replenish its glow ready for your baby's next bottle feed.

Anti-colic valve

Anti-colic valve is designed to keep air away from baby's tummy during feeding, to help reduce colic and discomfort.

No-drip teat

The teat opening is designed to release milk only when the baby is feeding. So you can confidently avoid milk loss whether at home or on the go.

Find the right teat flow

Every baby feeds differently and develops at their own pace. We've designed a range of flow rates so you can find the perfect one for your baby and personalise your bottle. All of the Natural Response Teats are made of soft silicone.

Simple to use and clean

Wide bottle neck makes filling and cleaning easy. Only a few parts for quick and simple assembly.

Highlights

Easy to hold

The ergonomic bottle is easy to grip at any angle to give maximum comfort during feeding. Easy for your hands and tiny hands to hold.

Compatible across the range

Mix and match our breast pump, bottle and cup parts and create the product that works for you, when you need it.

BPA-free*

The Philips Avent Natural Response bottles and teats are made of BPA free* material. Plus, all the Natural Response teats are made out of soft silicone.

Be patient as baby adjusts

Our new Natural Response Baby Bottles are different from free-flow baby bottles. Just like breastfeeding, it could take a few tries to get it right. That's perfectly natural.

ultra soft soother

The super soft, flexible shield follows the shape of your baby's cheeks, leaving fewer marks and causing less skin irritation, for more comfortable soothing.*
