1. Important information

Safety

- ◆ Before using the product, please read through and fully understand all instructions. The warranty will not cover damage caused by non-observance to the instructions.
- ◆ Suggest using only the manufacturer-specified accessories / components.
- ◆ Use only the alkaline or Li-polymer batteries the product is equipped with or use the same type of batteries with the same specification.
- ◆ Do not forcibly disassemble the product to avoid triggering the alert or damaging the product.
- ◆ Do not use any sharp object to scratch the fingerprint sensor, otherwise, it might cause permanent damage.
- ◆ Do not expose products to places that have water leakage or splashing.
- ◆ Do not expose the product to corrosive substances to prevent damaging the protective cover.
- ◆ Do not hang objects on the handle in case it might affect the normal use of the lock.
- ◆ Please clean the product with soft cloth.
- ◆ Do not disassemble the battery during setting up and operating.
- ◆ Please follow the assembly instructions that we provided to install the product and keep the relevant sealed stickers properly.
- ◆ Please modify the default master PIN code immediately after installation and configuration are done, and keep the mechanical key properly, do not disclose the PIN codes to others.
- ◆ Please replace all the batteries in time if there is a low battery alert. Please make sure to match the poles (+/-) correctly when installing the batteries.

Caution

- ◆ Do not place the batteries near ignition source to avoid explosion.
- ◆ Do not use any power supply that does not meet the safety requirements to power up the product.
- ◆ Do not connect the 2 poles of the batteries with metals to avoid short out which may lead to explosion.
- ◆ Please make sure any component replacement is executed by Philips, Philips authorized service centers or professional technicians.
- ◆ Do not use accessories or parts that have been produced by other manufacturers or have not been specifically recommended by Philips. The use of such accessories and parts may void your warranty.

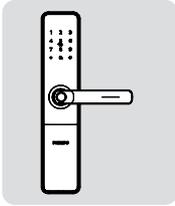

Disposal of used products and batteries

- ◆ You can have your locks reclaimed at Philips authorized service centers. You will receive corresponding compensation if your products meet our recall conditions.
- ◆ Please familiarize with the local electronic product collection system yourself.
- ◆ Please follow local regulations and do not discard used products and batteries into ordinary household waste.
- ◆ Please familiarize with the local regulations on batteries classification recycling yourself. Disposing of used products and batteries properly can help avoid a negative impact on the environment and human health.

Notice before assembling

Step 1 | Door swing direction

This product applies to doors with four opening directions: left-hand inswing, left-hand outswing, right-hand inswing, and right-hand outswing.

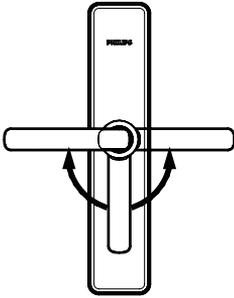

Step 2 | Adjustable front lever instructions

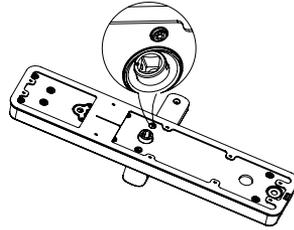

- 1 Loosen the screw on the lever and rotate the lever 180° to the right position.
- 2 Secure the screw on the lever.
- 3 When the door is right-hand swing, rotate the square shaft hole to make the line formed by the two small holes vertical to the ground; when the door is left-hand swing, rotate the square shaft hole to make the line formed by the two small holes horizontal to the ground.

Adjustable rear lever instructions

- 1 Loosen the screw on the lever and rotate the lever 180° to the right position.

- 2 Secure the screw on the lever.

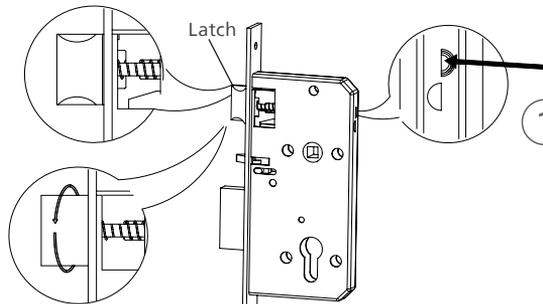

Attention

1. Choose a proper installation kit based on the door thickness. The default tool kit applies to a door thickness of 30-60mm. Please consult the local distributor for other door thicknesses.
2. If the length of the square shaft is too long, please cut it to a proper length according to the door thickness.

Step 3| Adjustable latch instructions

Adjust the latch direction to adapt to the door swing direction: if the slant of the latch is towards the outside door, then the door is inswing; if the slant of the latch is towards the inside door, then the door is outswing.

- 2 Push the latch in and rotate it to 180 degrees

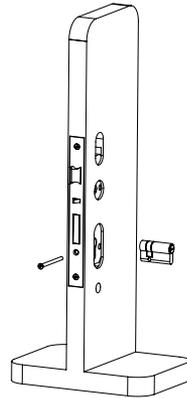

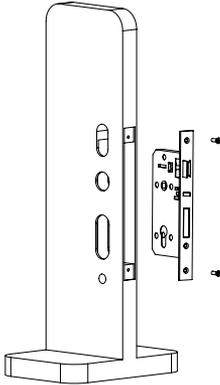

- 1 Press and hold the arrow position with a tool

- 3 Release the latch and let it rebound

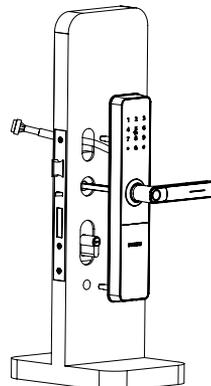

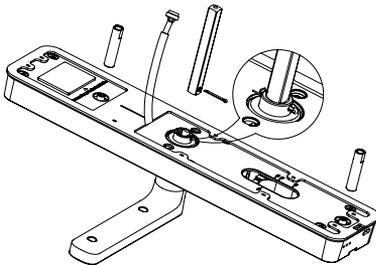

Assembly procedure

The following assembly procedure applies to the right-hand swing doors. For left-hand swing doors, please read through the [Notice before assembling] and complete the adjustable latch instructions.

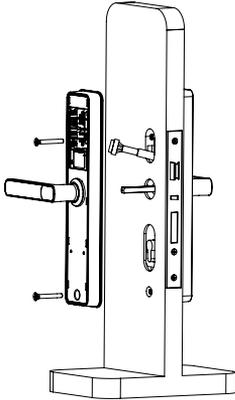

- 1 To drill holes in the door according to the drilling template, mount the mortise into the jamb, and tighten the anchor screws.
- 2 Assemble the lock cylinder to the mortise, and secure the lock cylinder with anchor screws.

- 3 Put the square shaft into the square shaft hole, and align the small hole in the square shaft with the hole in the square shaft hole. Once the square shaft is inserted, use a cotter pin to go through the holes and bend one of the straight legs of the cotter pin to secure the square shaft.
- 4 Pass the connecting cable through the hole, align and insert the square shaft of the outside escutcheon into the rotary hole, and ensure the outside escutcheon is tight against the outside of the door.

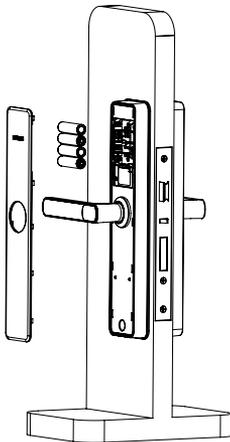

- 5 Insert the connecting cables into the sockets accordingly, and align the square shaft with the hole. Please be sure the inside escutcheon is closely attached to the inner surface of the door, then secure the inside escutcheon with M6 anchor screws.

⚠ Attention

Please cut the square shaft to a proper length according to the door thickness.

- 6 Install four AA batteries, and put the inside escutcheon cover on. Then check whether each part is connected and assembly in good condition.

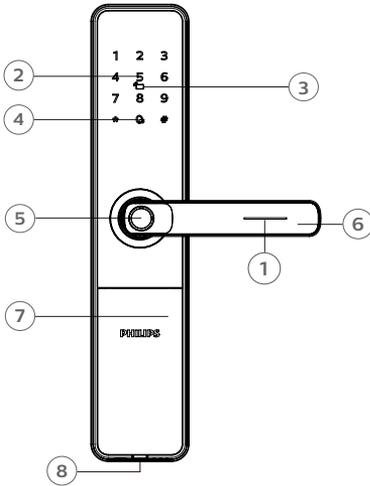

⚠ Attention

Please be sure that the inside escutcheon cover is fastened so that it will not fall off upon closing the door.

4 Settings

Instructions before setting

◆The system mode is divided into general mode and dual-verification mode.

General mode

Any enrolled access methods can unlock the door

Dual-verification mode

Any two enrolled access methods among PIN code, key tag, and fingerprint can unlock the door

⚠ Attention

1. This user manual covers 2 versions of DDL609.

Version 1: Fingerprint+PIN code+key tag+key

Version 2: PIN code+key tag+key

Note: Fingerprint unlock is optional.

2. In dual verification mode, the combined access methods will vary depending on different product versions.

Version 1: Fingerprint + PIN code, fingerprint + key tag, PIN code + key tag

Version 2: PIN code + key tag

◆Icon annotation

Master PIN code

User PIN code

Fingerprint

[#] key

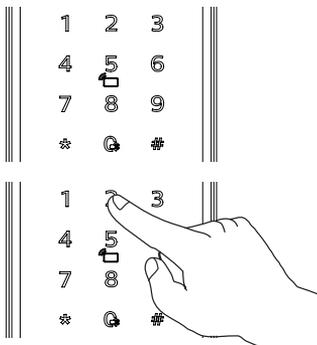

[*] key

Key tag

⚠ Attention

The default master PIN code is 12345678.

◆Master mode

① Light up the keypad

② Press [*] twice before entering other numbers, then enter the master PIN code and confirm with [#], so you are in master mode.

③ When entering the master mode, the system will sound a beep and the status indicator will flash in green for once.

Modify initial master PIN code

Press [*] twice, and enter the initial master PIN code "12345678", then press [#] to confirm.

After entering the master mode, enter the new master PIN code (6-12 digits) and press [#] to confirm, the indicator will flash in green once with a voice prompt. Enter the new master PIN code again and press [#] to confirm. Once the modification is done, the indicator will flash in green twice with a voice prompt.

Modify master PIN code

Press [*] twice, and enter the master PIN code, then press [#] to confirm.

1

Press [1] to modify the master PIN code. The indicator will flash in green once after [1] is pressed, indicating that the lock can perform in settings.

Enter a new master PIN code (6-12 digits) and press [#] to confirm. the indicator will flash in green once with a voice prompt. Enter the new master PIN code again and press [#] to confirm. Once the modification is done, the indicator will flash in green twice with a voice prompt.

User settings

Press [*] twice, and enter the master PIN code, then press [#] to confirm.

2

Press [2] to add a PIN code. The indicator will flash in green once after [2] is pressed, indicating that the lock can perform in settings.

Enter a user PIN code (6-12 digits) and press [#] to confirm, the indicator will flash in green once with a voice prompt. Enter the user PIN code again and press [#] to confirm. Once the adding is done, the indicator will flash in green twice with a voice prompt.

Delete a PIN code

Press [*] twice, and enter the master PIN code, then press [#] to confirm.

3

Press [3] to delete a PIN code. The indicator will flash in green once after [3] is pressed, indicating that the lock can perform in settings.

Enter the PIN code that needs to be deleted and press [#] to confirm. After the deletion, the indicator will flash in green twice with a voice prompt.

Add a PIN code (optional)

Press [*] twice, and enter the master PIN code, then press [#] to confirm.

5

Press [5] to add a fingerprint. The indicator will flash in green once after [5] is pressed, indicating that the lock can perform in settings.

Place your finger on the fingerprint sensor, and after you hear a "beep" take your finger off and put it back again, repeat the action 8 times to finish fingerprint enrollment.

After adding the fingerprint, the indicator will flash in green twice with a voice prompt.

⚠ Attention

The fingerprint is an optional feature, if the product you purchased has a fingerprint unlock function, please follow this step to enroll user fingerprints; if there is no fingerprint unlock function, please skip this step.

Delete a PIN code (optional)

Press [*] twice, and enter the master PIN code, then press [#] to confirm.

6

Press [6] to delete a fingerprint. The indicator will flash in green once after [6] is pressed, indicating that the lock can perform in settings.

Place your finger on the fingerprint sensor until you hear a voice prompt, when the indicator flashes in green twice, indicating the deletion is done.

⚠ Attention

The fingerprint is an optional feature, if the product you purchased has a fingerprint unlock function, please follow this step to enroll user fingerprints; if there is no fingerprint unlock function, please skip this step.

Add a key tag

Press [*] twice, and enter the master PIN code, then press [#] to confirm.

7

Press [7] to add a key tag. The indicator will flash in green once after [7] is pressed, indicating that the lock can perform in settings.

Place the key tag on the card reader until you hear a beep, when the indicator flashes in green twice, indicating the enrollment is done.

Delete a key tag

Press [*] twice, and enter the master PIN code, then press [#] to confirm.

8

Press [8] to delete a key tag. The indicator will flash in green once after [8] is pressed, indicating that the lock can perform in settings.

Place the key tag on the card reader, after you hear a voice prompt, the indicator will flash in green twice, indicating that the deletion is done.

Passage mode

Press [*] twice, and enter the master PIN code, then press [#] to confirm.

9

Press [9] to enter into passage mode settings. The indicator will flash in green once after [9] is pressed, indicating that the lock can perform in settings.

1

 or

2

Press [1] to enable passage mode, so anyone can press down the handle to unlock the door.

(1)Mute: when the outside escutcheon lights up, press the [mute button] for 2 seconds to enter mute mode, and the indicator will glow in white.
(2)Unmute: when the outside escutcheon lights up, press the [mute button] for 2 seconds to restore to voice guide, and the indicator will glow in white.

7 Indicators

Status indicator

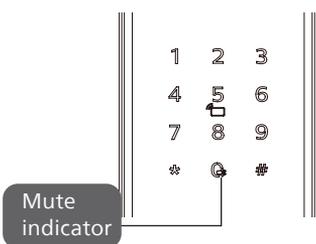

Meanings of the indicator in different colors

Blue: when the system wakes up, the indicator will turn blue, indicating that the door lock can be processed and operated;

Green: when the door lock is unlocked, the indicator will turn green, indicating that the door has opened;

Red: when the door lock is locked, the indicator will turn red, indicating that the door has closed.

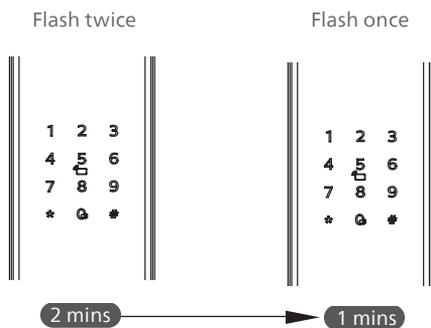

Mute indicator

Meanings of the indicator in different colors

White: whether the mute mode is on or off, the icon is white.

System-locking indicator

The door lock will be locked for 100 seconds if there are 5 consecutive incorrect inputs among any of the 3 types of access methods (fingerprint, PIN code, or key tag) within 5 minutes.

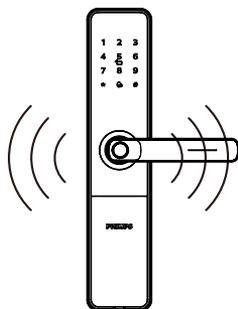

⚠ Attention

1. Only when touching to wake up the keypad or verifying the access methods will the system appear such a system-locking prompt.
2. Fingerprint unlock is optional. Fingerprint unlocking is only available with the product that has fingerprint unlocking.

8 Troubleshooting

Alert types

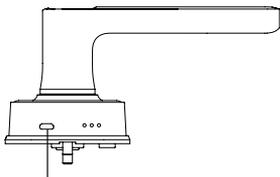

Low battery alert

Triggering: when the system wakes up, the battery voltage will be automatically detected. If the battery voltage is insufficient, an alert will be triggered to remind you to replace the battery.

Alert mode: with a voice prompt during unlocking.
Off: turn off automatically.

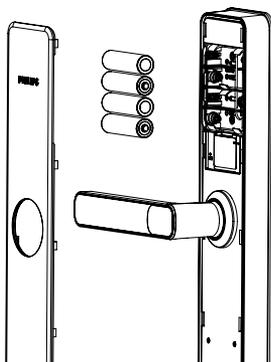

How to apply an external power supply

External power supply interface

When the battery voltage is insufficient, and the door cannot open from outside, you can power up the lock through a 5V power bank as an external power supply via the Type-C interface. After opening the door lock, please replace the batteries immediately.

Battery replacement

The lips are located at the bottom end of the inside escutcheon. You can open the inside escutcheon cover by pulling it up from the lips to remove the cover and replace the battery.
