Safe and road-legal LED light

- Road-legal LED upgrade lights

Automotive-grade quality

- The durability that today's drivers demand

Comply with interior lighting

- Suitable with a wide range of interior applications

Performance made to last

- Enhanced lifetime of up to 10,000 hours

Highlights

6000 K for crisp white light

With a high colour temperature of up to 6000 Kelvin, the Philips Ultinon Pro6000 W5W-LED produces a bright white light that's close to daylight. The optimal colour temperature avoids tiring or straining the eyes, giving you more comfortable and safer night-time driving by headlights, while the position lights are colour-matched for a harmonious stylish look.

Safe and road-legal LED light

Convert your car's front position lights with our tested, safe and road-approved* Philips Ultinon Pro6000 LED lights for a breathtaking new look and an unrivalled driving experience. They have been approved by the Ministry of Transport for use on public roads and for selected car models. Philips Ultinon Pro6000 W5W-LED also comply with all interior use for better light comfort. Check our [Philips.com/roadlegalLED](https://philips.com/roadlegalLED) page* for further information.

Comply with interior lighting

Want to convert your interior car lights to LED for a brighter and more stylish effect? Philips Ultinon Pro6000 W5W LED lights are compatible with most interior lighting applications such as

boot light, door light, entry light, glove box light or reading light. Experience superior light quality inside your car for better visibility and comfort.

Up to 3 years' warranty***

You want bright, stylish lights but you don't want to keep replacing failed lights. That's a major weakness of conventional headlights; the more powerful the light, the shorter its lifespan. At a higher light-intensity level, LEDs last much longer, and Philips Ultinon Pro6000 signalling lights are built to last. Due to their unique ceramic heat-management system, CeraLight, they last for up to 10,000 hours of operation.

Durability for today's drivers

Philips Ultinon Pro6000 bulbs are also guaranteed EMI-compliant, conforming to automotive-industry standards on electromagnetic interference. Precision-engineered to withstand the rigours of modern motoring life, they offer the durability that today's drivers demand. Their daily performance provides confidence behind the wheel and brighter, consistent light throughout the journey.

Specifications

Marketing specifications
