- Lets baby's skin breathe

Comfortable, soft and silky teat

- 98% teat acceptance*
- Nipple made of 100% food-grade silicone
- Natural oral development

Quality assured

- Designed and produced in the Netherlands

Highlights

Lets baby's skin breathe

Extra-large airholes ventilate your baby's skin, keeping it dryer while soothing.

98% teat acceptance*

When we asked parents how their little ones respond to our textured, silicone teats, an average of 98% said that their baby accepts the Philips Avent ultra soft and ultra air soothers.

Nipple made of 100% silicone

We consciously chose silicone material for our ultra soft and ultra air teats since it's a safe and inert material, widely used in medical applications, and free from hazardous chemicals, endocrine active substances (e.g. BPA) and allergens.

Orthodontic teat

Our orthodontic, symmetrical soft silicone nipples are designed for natural oral development.

Sterilise in 3 minutes

The travel case that comes with our ultra soft and ultra air soothers doubles as a steriliser. All you need to do is add some water and pop it in the microwave. Then rest easy that it's clean for the next use.

Produced in the Netherlands

Our ultra soft and ultra air soothers are designed and produced in the Netherlands.
