

PHILIPS

A photograph of two women in a professional setting. The woman on the left has long dark hair and is wearing a pink blazer over a white top. She is gesturing with her right hand while looking at a tablet. The woman on the right has dark hair tied back and is wearing a white lab coat. She is holding the tablet and looking at the screen. The background is a bright, modern interior with large windows.

Reimagine your
circle of care

Choose high-quality circular equipment
with people and planet in mind

Quality care within your reach

Record demand, an aging population, and inflation are all squeezing healthcare budgets. Waiting lists are growing, delaying access to vital services, but spending your way out of the situation isn't always possible due to budget constraints. It's time to reimagine your circle of care with solutions that bring access to quality care within your reach.

Philips Circular Equipment

Philips Circular Equipment comprises two portfolios of medical systems that will bring new life into your imaging departments: Circular Edition refurbished systems, and Select Edition pre-owned, Philips-tested systems. Available at attractive pricing compared to similar new Philips systems, our Circular Equipment offers the quality and performance that you expect from Philips, without the carbon footprint that comes from buying brand new.

Circular is value for money

At a time when healthcare costs are rising, choosing Philips as your trusted partner is a cost-effective way to get the equipment you need within your budget.

Circular is quality

Philips build quality is engineered for lasting performance. All our Circular Equipment undergoes a stringent Philips process following approved procedures aimed at guaranteeing quality and reliability.

Circular is sustainable

We put your sustainability goals at the heart of all we do. It means thinking circular, using fewer resources and more recycled content to reduce your impact.

Reimagine your equipment options

Philips Circular Equipment is divided into two distinct portfolios that maximize the value of high-quality equipment across multiple lifecycles, while minimizing its environmental impact. This cross-modality comparison may vary according to your specific equipment choices.

Circular Edition – rethink new

A range of high-quality refurbished medical imaging systems that offer as good as new image quality and performance, with the same warranty and service performance levels as new Philips systems:

- 25% cheaper than equivalent new systems¹
- Fully configurable to suit your needs
- Full cosmetic makeover
- Same-as-new warranty
- Uptime and support options for remaining service life
- Tested and validated following rigorous 7-step refurbishment process
- Proactive replacement of OEM components and parts
- Software updates available²
- Reuses 80% average weight³ of returned systems

Select Edition – revalue pre-owned

A range of pre-owned medical imaging systems that are inspected and tested to Philips' original specifications:

- Economically-priced to maximize access to care
- Pre-defined configurations with upgrade possibilities⁴
- Cosmetic rework available on selected products
- Default 1-year warranty⁵
- Uptime and support options for remaining service life
- Inspected and tested for performance following Philips' procedures
- All necessary repairs including planned maintenance
- Locally-sourced when available to reduce transport emissions

It's time to reimagine your circle of care

Whatever your challenges, we're here to help you to reduce the cost of equipping vital services with an affordable, circular solution. So, you can offer quality, accessible, and equitable care for every single patient.
