Highlights

Smart screen

The smart screen provides instant feedback on your brushing pressure, duration, battery life, and even the notification of when to replace the brush head. One click to master key messages for better brushing habits without installing an app.

Sonicare Fluid Action

Our unique sonic sweeping motion is carefully calibrated to create gentle microbubbles that reach deep between the teeth. 31,000 brush strokes per minute** gently clean your teeth, break up plaque, and sweep it away for an exceptional daily clean.

Routine made easy

2-minute SmarTimer and 30-second QuadPacer guide you to brush for the recommended time in all areas of your mouth to ensure a complete clean.

C3 Premium Plaque Defense

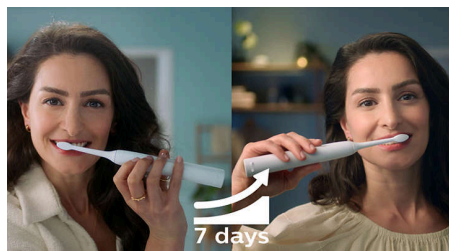

C3 Premium Plaque Control brush head is wrapped with gel. It gently absorbs excessive pressure on your gums and teeth for your best cleaning experience. The top of the bristles is rounded, and the arc design is adopted to increase the contact surface of the bristles, protect the gums and clean them efficiently.

2 brushing modes

Philips Sonicare Brilliant Clean has 2 modes for all your brushing needs. Clean mode provides an exceptional daily clean. White mode removes stains efficiently.

Easy-Start

Our Easy-Start program gives you the option of a gradual, gentle increase in brushing power the first 14 times you use your new toothbrush.
