Under-the-sink
system

Philis

Reverse osmosis filtration

AUT9321/93

*New launch
coming soon*

Reverse osmosis filtration

Deep reverse osmosis filtration down to 0.0001 microns

Build for your convenience

- Make full use of the space by installing the system flexibly

Highlights

Flexible installation

The system can be installed vertically or horizontally, helping you to make full use of the space.

Specifications

Filtration performance

Chlorine reduction
Microplastics reduction
Bacteria reduction
Pesticides reduction
Water hardness reduction
VOC reduction
Viruses reduction
Heavy metals reduction
Total dissolved solids (TDS) reduction
PFOA reduction
PFAS reduction

Filter specifications

Filtration Precision: Down to 0.0001 micron

General specifications

Inlet water temperature: 5-38°C °C
Drain water ratio: 65% (2:1)
Inlet water pressure: 0.1-0.4 MPa
Voltage: 220V
