

PHILIPS

RO Water Tap - with remineralizer

Reverse Osmosis purification

Reverse osmosis filtration

Reduces PFAS, chlorine, pharmaceuticals

400 gallon per day (GPD) filtration capacity

70% water recovery rate

AUT8950/79

Our most compact RO water purification system

Aquaporin Inside™ removes 110 kinds of substances*

Enjoy purified water enriched with minerals. 6-stage deep filtration effectively reduces chlorine, odor, particulates and total dissolved solids as small as 0.0001 micron, for cleaner, better-tasting water. Available via BUNNINGS.

Build for your convenience

- Designed and Manufactured to Australian Standards

Highlights

Watermark certified

In Australia, all plumbing and drainage products must be installed by a licensed plumber - and may only be installed if they carry WaterMark

certification. This Philips Tap Water Station is fully certified to meet the latest Australian and New Zealand standards, like AS/NZS 3497:2021 for drinking water treatment systems. The certification ensures the product complies with all regulatory, safety, and performance requirements for use in Australian homes.

Specifications

Filtration performance

Microplastics reduction

Chlorine reduction

Pesticides reduction

Bacteria reduction

VOC reduction

Viruses reduction

PFOS reduction

Heavy metals reduction

Filtration mode: Purified water mode and filtered water mode

Total dissolved solids (TDS) reduction

PFOA reduction

Mineralization

PFAS reduction

General specifications

Voltage: 220-240
