massager

Back and waist massager

Deep Vertical Push

Flexible Swinging Stretch

Gentle Vibration Relief

2000mAh Lithium Battery

PPM4342GY

All-Round Massage Revive Your Back Vitality

Feels Like Hands Instant Warmth on Demand

The PPM4342 delivers effortless, zero-gravity relaxation. Featuring airbag traction & lifting, soothing massage, vibration deep pressing, and light & heat therapy, it offers professional-grade lumbar support.

Gentle Vibration Relief

- imitating human hands for high-frequency kneading & tapping

2000mAh Lithium Battery

- Up to 12 days of use per single charge

Deep Vertical Push

- Equipped with a large-area dynamic floating airbag engine,
- Equipped with a large-area dynamic floating airbag engine,

Flexible Swinging Stretch

- Equipped with a large-area dynamic floating airbag engine,

4-Zone Metal Heat Massage Heads

- Independent heating structure with larger hot compress area

Highlights

Airbag Upward Lifting & Pushing

Equipped with a large-area dynamic floating airbag engine,

4-Zone Metal Heating Module

4-Zone Metal Heating Modules. The metal heating sheets deliver faster heating, providing noticeable penetrating warmth in just 8 seconds.

2000mAh High-Performance Lithium Battery

Wireless design with Type-C charging port for convenient recharging anytime, anywhere, so you can stay powered outdoors with no battery anxiety.

Surge-style physical vibration waves

Incorporating human-hand simulated high-frequency vibration technology, it mimics gentle tapping massage. The vibration penetrates layer by layer to deeply relax stiff lumbar muscles, relieve fatigue and soreness, and enhance the effect of lumbar stretching and support.

Airbag Upward Lifting & Pushing

Equipped with a large-area dynamic floating airbag engine, it gently lifts and relaxes your lower back through continuous airbag expansion, with 8 adjustable lumbar support heights.

Airbag swings horizontally up to 27°

The airbag swings horizontally up to 27°, simulating the stretching motion of human hands to relax the lumbar muscles on both sides. It helps mobilize the erector spinae and quadratus lumborum, relieving tension in the lower back.
