## Philips Tableaux 13" full colour healthcare eSign

Smart. Easy care. Zero power patient info display

Imagine a smart, ultra clear e-paper display that replaces paper posters or static screens with no power or waste, 6 colours visuals on a one-sided display, making every info board as refined and sustainable as it is effective.

### Positioning versatility

- Easy clean with alcohol based cleaning fluids.
- No need for a constant power connection.
- Possible to move bays or wards with patient.

### Smart, vivid information

- E Ink Spectra 6 tech – colour coded visual info.
- Show content indefinitely, using zero power.

### Supporting time and energy efficiencies

- Using super low power when updating content.
- Using zero power to show static information.
- Connect and control content via the cloud.

## Highlights

### Using super low power when updating content.

Using super low power when updating content.

### Easy clean

Hygienic and easy to keep clean, the Philips Tableaux Healthcare eSign can be wiped down with normal, alcohol based healthcare cleaning fluid.

### Using zero power to static information.

With no need for power once your patient details are loaded, your Philips Tableaux Healthcare eSign only uses super low power when you change out the info if vital stats change or if you connect with Philips Wave for management control. And with no print or paper wastage from printed or handwritten signs, it contributes to your sustainability commitments, too.

### Smart vivid information – 24/7

The Philips Tableaux Healthcare eSign is designed to show patient details and static content, indefinitely, without the need for

power. Designed incorporating E Ink's Spectra 6 ePaper technology, display with six colours for vivid, clean, and clear, colour coded visuals.

### Show content indefinitely, using zero power.

Show content indefinitely, using zero power.

### Positioning versatility

Weighing just xxg and with no need for a constant power connection, your Philips Tableaux Healthcare eSign can be moved from bedside to bedside and ward to ward, travelling with your patient with ease to ensure their vital info is always at hand. Simply plug it in or rely on the built-in 3000mAh lithium battery—rechargeable via USB-C—utilizing super low power to update content only when needed.

### Connect and control content via the cloud.
