Cold and hot water made easy

With compressor cooling technology, this bottled water dispenser produces cold water efficiently. It also comes with child lock for hot water, keeping children safe from accidental hot water burns.

Child lock to prevent hot water burns

- Child lock to prevent hot water burns
- Compressor cools water efficiently
- Wide dispensing area fits various sizes of containers

Highlights

Child lock to prevent hot water burns

Child lock for hot water keeps children safe from accidental hot water burns.

Compressor cools water efficiently

Compressor cooling produces cool water more efficiently and faster, compared to conventional thermoelectric cooling.

Wide dispensing area fits various sizes of contain

Wide dispensing area easily fits various sizes of cup, glass, bowl and even pot.

Specifications

Heating performance

Heating power: 420W

Hot water tank: 1.1L

Heating capacity: 5L/H

Cooling Performance

Cooling power: 85W

Cooling capacity: 2.0L per hour

Cooling system: Compressor cooling

Refrigerant: R134a

General specifications

Voltage and frequency: 220V-240V~, 50Hz/60Hz

Water flow rate: 1.2L/min

Cold water temperature: 10 °C

Hot water temperature: 90 °C

Country of origin

Water dispenser: China
