

Philips IntraSight Plus: Designed for procedural and catheter lab efficiency^{1,2}

Key workspace features:

Rapid co-registration/tri-registration

Essential data displays within seconds on one intuitive screen

Device detection/vessel enhancement

Precise device placement without added radiation or contrast

Zero-contrast workflow

Expand PCI access for patients with kidney failure

Enhanced touchscreen monitor (TSM)

Full tableside control—without breaking scrub.

Advanced connectivity across IntraSight, Azurion, and PACS

Seamless automatic archiving and patient history retrieval for overall efficiency^{2,3}

A connected interventional workflow

Azurion and IntraSight Plus

By integrating Azurion and IntraSight Plus through the touchscreen monitor (TSM), physicians can access and control imaging, physiology, and intravascular applications from a single tableside monitor. This reduces system clutter, eliminates duplicate data entry by automatically sharing patient demographics, and keeps clinicians focused on the patient—not the technology.

Detection

IntraSight Plus delivers quantitative and qualitative data for better clinical care and operational efficiencies.^{2,3}

All the efficiency

Access every tool you need in a single, all-in-one platform, so you can spend less time managing multiple technologies and more time on patient care.

"The TSM allows my staff to review the case and perform measurements in real time while staying in the sterile field."

Javier Escaned, MD PhD FESC

All the simplicity

Deploy a simple, intuitive workflow with a unified interface, built-in procedural guidance and complete bedside control – so your focus can stay on clinical decisions.²

"IntraSight Plus brings essential tools together in one platform, streamlining workflows and informing treatment decisions."

Ziad Ali, MD

All the precision

Make every decision evidence-based with Class IA IVUS and iFR and the only platform with tri-registration – so you can confidently plan, virtually estimate results and perform precise PCIs for better patient care.³

"IntraSight Plus unifies Philips' imaging tools in one platform—giving our team more precision and confidence at the bedside."

Garrett Wong, MD

Save up to 47% in system operation time
with the completely redesigned interface that integrates
IntraSight and SyncVision into one efficient workflow.³
