

PHILIPS

dS HandWrist 16ch

MR Coil

Designed for **high resolution imaging**

Coil that closely fits the left or right hand and wrist for high signal-to-noise ratio (SNR). This design provides the high SNR needed to acquire images with a small and larger field of view (FOV). It has a one piece, ovoid, hinged design for easy patient set up. High quality imaging can be obtained with the coil at the patient's side. The coil attaches to a rigid base plate for fixation to reduce patient motion artifacts.

Initial delivery in USA.

dS HandWrist 16ch

System configuration	1.5T systems with dStream.
Main applications	Hand, wrist.
Coverage	10 cm for wrist, 28 cm for hand and wrist.
Maximum nr. of channels	16.
Coil type	Dedicated.
Data sampling	dStream digital broadband.
Parallel imaging	dS SENSE enhanced parallel imaging performance.
